

Interpreting Graphs

When you think of the word graph, you probably imagine something with lines, numbers, maybe colors, and sometimes pictures. A **graph** is a method of representing values for comparing, contrasting, and analyzing, as well as for interpreting the information presented in the graph. A graph may also be referred to as a table, chart, diagram, or grid. Regardless of what it is called, graphs contain important and useful information, which can be interpreted in a number of ways. The most popular type of graphs are bar and line graphs, pie charts, and tables. [Here are examples of each kind:](#)

BAR GRAPH

LINE GRAPH

Year	2000	2001	2002	2003	2004
Population	100	105	110	115	120
GDP	50	55	60	65	70
Unemployment	5	6	7	8	9
Inflation	2	3	4	5	6

DATA TABLE

Graphs come in all sizes, shapes, and colors, representing a wide variety of information. The information in a graph can show the results of elections, people's favorite ice cream, stock market prices, rainfall amounts for a year, airplane flight numbers and times, sport's statistics, changes over time, profits from sales, tax rates, and much more. If you read a newspaper, magazine, or story on the Internet, you can be sure to see one almost every day.

Graphs are helpful for presenting information quickly and in an organized way. All graphs have a **title**, a **legend**, which may tell what a color or symbol means on the graph, and often a **horizontal or vertical axis**, which tells about the increments and **units**. Some graphs are better for some information, but not as useful for other types of information. For example, a pie chart would not be used to show rain during each month of the year; instead, a line graph would probably be more effective.

Interpreting graphs does not mean reading the numbers and you're done. **Interpreting graphs** means reviewing the numbers and then learning something. For example, if an ice cream salesman notices vanilla is a community's favorite flavor, he may want to have more vanilla ice cream at his store than another flavor. He interpreted the graph, looking beyond the numbers.
