COMNAVMETOCOM INSTRUCTION 3144.1E

From: Commander, Naval Meteorology and Oceanography Command
Subj: U.S. NAVY MANUAL FOR SHIP'S SURFACE WEATHER OBSERVATIONS
Ref: (a) NAVMETOCOMINST 3140.1L
(b) NWP-4
Encl: (1) U.S. Navy Manual for Ship's Surface Weather
Observations

1. Purpose. The purpose of enclosure (1) is to provide U.S. Navy ships with the basic instructions for observing, recording, and encoding surface marine weather observations. This instruction has been completely revised and should be reviewed in its entirety.

2. Cancellation. COMNAVMETOCOMINST 3144.1D

3. Discussion. Accurate and timely submissions of environmental observations are basic to the development of oceanographic and meteorological forecasts and tactical indices used in support of fleet operations. Since the U.S. Navy may be committed to operations anywhere in the world, global observations of meteorological conditions observed by its deployed forces are required. In remote areas, particularly over oceanic areas where environmental data are notably sparse, weather observation data from Navy ships become particularly vital. The minimum requirements for taking and reporting environmental observations by Navy and Military Sealift Command (MSC) ships are prescribed in reference (a). Additional requirements are also promulgated in pertinent operation orders (OPORD), plans (OPLANS), and tasking (OPTASK) orders. These plans should be consulted to ensure ships are complying with fleet and operational commander orders. In addition, special weather reporting requirements by ships at sea in specific areas, particularly where tropical cyclones or other large scale disturbances are suspected or known to exist, will be occasionally promulgated by the cognizant area or force
