I believe that the E Symposium on Industrial and Systems Engineering (ISE) should promote an integrated learning environment for an interdisciplinary approach through its academic advisory programs that provide mathematics, statistics, and computer science as additional rather than engineering subjects. Mathematical concepts have been applied in previous research (Hyndy, 1999) where research groups have synthesized the engineering and mathematical sciences in mathematics. I believe that ISE should have the opportunity to expand on the knowledge I was introduced to as "Math Week". I am excited to be able present to that learning system as the E Symposium on Industrial and Systems Engineering through the integration of the academic knowledge and my personal/industry-related studies as research in an interdisciplinary environment.

Wisconsin in the World Elise S. Ahn,2023-07-01 During the 2020 and 2021 phases of the global COVID 19 pandemic there was significant prognostication regarding what internationalization in higher education would look like in its aftermath Within the field of international education many stated the need to reimagine internationalization in and of higher education in the face of severe budget cuts restrictions on travel and increased government protectionism in the face of growing nationalistic populism globally to name a few challenges Absent from many of those discussions however were the voices of many leader practitioners who have had to think flexibly about internationalization in higher education in order to sustain and grow programs throughout the last 20 years despite numerous exogenous factors e g earlier economic recessions and viral outbreaks along with endogenous factors like internal leadership transitions and institutional reorganizations Wisconsin in the World explores how internationalization at the University of Wisconsin Madison UW has been a decades long ongoing endeavor Against that backdrop the various chapters also provide a snapshot of how people across the UW campus were reflecting on their work amidst the COVID 19 pandemic and on the implications of the pandemic regarding the future of campus internationalization The book is organized into four overarching sections internationalization of the curriculum general and language experiential learning co curricular engagement and education away establishing linkages institutional and outreach and administration To highlight the expansive way campus units have been engaging in internationalization a wide ranging set of chapter case studies have been included Although not exhaustive this volume does provide a robust cross sectional view into internationalization at UW For international education scholars and practitioners then a number of the chapters also highlight areas that may warrant further engagement and exploration moving forward Finally by examining how internationalization at UW has been informed

by the Wisconsin Idea this book explores how institutional internationalization strategies can align with and be tailored to institutional values for long term sustainability In addition to the 34 chapters focusing on different units and programs at UW Wisconsin in the World also includes a number of contributions from colleagues at other institutions Each section has a lead in chapter which provides an overview of the scholarship in that particular area and or a concluding chapter from a scholar practitioner situating the UW cases in relation to their own work The intention of structuring the book this way was to facilitate a dialogue among UW colleagues across institutions and with the scholarship in the field The target audience for Wisconsin in the World includes practitioners or scholar practitioners in the field of international education study abroad education away internships partnerships program development as well as faculty and students in global higher education or comparative and international education graduate programs Additionally this volume may be of general interest for any higher education administrator who may not have a background in international education but may become responsible for programs and support within a school or college context e g a dean or department chair **AATSEEL's Newsletter** ,1999

Mary Jordan Meiser,1995 **Making Nature Whole** William R. Jordan,George M. Lubick,2011-07-26 Making Nature Whole is a seminal volume that presents an in depth history of the field of ecological restoration as it has developed in the United States over the last three decades The authors draw from both published and unpublished sources including archival materials and oral histories from early practitioners to explore the development of the field and its importance to environmental management as well as to the larger environmental movement and our understanding of the world Considering antecedents as varied as monastic gardens the Scientific Revolution and the emerging nature awareness of nineteenth century Romantics and Transcendentalists Jordan and Lubick offer unique insight into the field s philosophical and theoretical underpinnings They examine specifically the more recent history including the story of those who first attempted to recreate natural ecosystems early in the 20th century as well as those who over the past few decades have realized the value of this approach not only as a critical element in conservation but also as a context for negotiating the ever changing relationship between humans and the natural environment Making Nature Whole is a landmark contribution providing context and history regarding a distinctive form of land management and giving readers a fascinating overview of the development of the field It is essential reading for anyone interested in understanding where ecological restoration came from or where it might be going **Environment, Social Justice, and the Media in the Age of the Anthropocene** Elizabeth G. Dobbins,Luigi Manca,Maria Lucia Piga,2020-02-17 Environment Social Justice and the Media in the Age of Anthropocene addresses three imminent challenges to human society in the age of the Anthropocene The first challenge involves the survival of the species the second the breakdown of social

justice and the third the inability of the media to provide global audiences with an adequate orientation about these issues. The notion of the Anthropocene as a geological age shaped by human intervention implies a new understanding of the human context that influences the physical and biological sciences. Human existence continues to be affected by the physical and biological reality from which it evolved but in turn it affects that reality as well. This work addresses this paradox by bringing together the contributions of researchers from very different disciplines in conversation about the complex relationships between the physical biological world and the human world to offer different perspectives and solutions in establishing social and environmental justice in the age of the Anthropocene.

Education Is Not an App Jonathan A. Poritz, Jonathan Rees, 2016-08-12

Whilst much has been written about the doors that technology can open for students less has been said about its impact on teachers and professors. Although technology undoubtedly brings with it huge opportunities within higher education there is also the fear that it will have a negative effect both on faculty and on teaching standards. *Education Is Not an App* offers a bold and provocative analysis of the economic context within which educational technology is being implemented not least the financial problems currently facing higher education institutions around the world. The book emphasizes the issue of control as being a key factor in whether educational technology is used for good purposes or bad purposes arguing that technology has great potential if placed in caring hands. Whilst it is a guide to the newest developments in education technology it is also a book for those faculty technology professionals and higher education policy makers who want to understand the economic and pedagogical impact of technology on professors and students. It advocates a path into the future based on faculty autonomy shared governance and concentration on the university's traditional role of promoting the common good. Offering the first critical in depth assessment of the political economy of education technology this book will serve as an invaluable guide to concerned faculty as well as to anyone with an interest in the future of higher education.
