Challenging the Representation of Ethnically Divided Cities Giulia Carabelli, Aleksandra Djurasovic, Renata Summa, 2021-05-24 The book *Challenging the Representation of Ethnically Divided Cities* Perspectives from Mostar questions the existing overrepresentation of Mostar as an ethnically divided city While acknowledging the existence of internal borders the chapters in this book assert that they are not solid nor fixed and by exploring how they become material or immaterial the book offers a deeper understanding of the city's complex dynamics Accordingly the chapters in this book are attentive to how ethnic divides materialise or lose importance because of socio political contingencies Events groups and spaces that promote reconciliation from the bottom up are examined not necessarily to assess their success and failures but rather to look at how they create networks gain trust and form platforms that generate novel understandings of ethnic loyalties and party memberships Further and drawing both on the empirical data and theoretical reflections this volume contributes to broader debates about divided cities by suggesting the need to engage with these cities in their complexities rather than reducing them to their ethno national divisions The book engages with socio political and economic complexities in order to shed light on how ethnic conflicts and resulting spatial partitioning are often just the surface of much more complex dynamics that are far less easy to disentangle and represent The chapters in this book were originally published in *Space and Polity*

Dear Comrade President André Odendaal,2022-08-01 In his annual presidential address on 8 January 1986 ANC president Oliver Tambo called on South Africans to make apartheid ungovernable through armed action and militant struggle But unknown to the world on that very day the quiet spoken mathematics teacher and aspirant priest turned reluctant revolutionary had also set up a secret think tank in Lusaka which he named the Constitution Committee giving it an ad hoc unique exercise that had no precedent in the history of the movement Knowing that all wars end at a negotiating table and judging the balance of forces to be moving in favour of the liberation movement Tambo wanted the ANC to hold the initiative after the fall of apartheid Assisted by Pallo Jordan he instructed his new think tank to formulate the principles and draft the outlines of a constitution that could unite South Africa when the time came to talk in the fledgling days of freedom and democracy The seven member team including Albie Sachs Kader Asmal and Zola Skweyiya started deliberating and reporting to Tambo In correspondence they typically addressed him as Dear Comrade President Drawing on the personal archives of participants Dear Comrade President explains how the purposeful first steps were taken in the making of South Africa s Constitution Why and how did this process happen What were the first written words When and where were they put on paper By whom What values did they espouse And how did the committee s work fit into the broader struggle This book answers these questions in new paradigm shifting ways

Academic Biliteracies David M. Palfreyman,Christa van der Walt,2017-03-02 Research on academic literacy within higher education has focused almost exclusively on the development of academic literacy in English This book is unique in showing how students use other languages when they engage with written academic content whether in reading discussing or writing and how increasingly multilingual higher education campuses open up the possibility for students to exploit their multilingual repertoires in and around reading writing for academic purposes Chapters range from cases of informal student use of different written languages to pedagogical institutional and disciplinary strategies leveraging multilingual resources to develop biliteracy They are ordered according to two dominant themes The first includes accounts of diverse multilingual contexts where biliteracy practices emerge in response to the demands of academic reading and writing The second theme focuses on more deliberate attempts to teach biliteracy or to teach in a way that supports biliteracy The collection will be of interest to researchers higher education practitioners and students of multilingual higher education and academic literacy

Beyond the Information Commons Charles Forrest,Martin Halbert,2020-08-22 In the closing decades of the twentieth century academic libraries responded to rapid changes in their environment by acquiring

and making accessible a host of new information resources developing innovative new services and collaborative partnerships and building new kinds of technology equipped spaces to support changing user behaviors and emerging patterns of learning The Information Commons or InfoCommons blossomed in a relatively short amount of time in libraries across North America and around the world particularly in Europe and the British Commonwealth This book is more than a second edition of the 2009 book A Field Guide to the Information Commons which documented the emergence of a range of facilities and service programs that called themselves Information Commons This new book updates this review of current practice in the Information Commons and other new kinds of facilities inspired by the same needs and intents but goes beyond that by describing the continued evolution This new book is an attempt to answer the question What might be the next emerging concept for a technology enabled user responsive mission driven form of the academic library Like its predecessor Beyond the Information Commons is structured in two parts First a brief series of essays explore the Information Commons from historical organizational technological and architectural perspectives The second part is a field guide composed of more than two dozen representative entries describing various Information Commons using a consistent format that provides both perspective on issues and useful details about actual implementations Each of these includes photos and other graphics

Educational Digital Transformation: New Technological Challenges for Competence Development Julio Cabero Almenara, Carmen Llorente Cejudo, Antonio Palacios-Rodriguez, 2023-10-09 The COVID 19 pandemic has provided a unique opportunity to examine our understanding of the opportunities and challenges that ICTs offer to support the functioning of all aspects of education The closure of educational institutions has forced a radical change in the practices of teachers and societies regarding the use of ICT to support teaching learning social relations and work in many sectors In the training of digital skills the instrumental mastery of ICT continues to outweigh the preparation of citizens to make constructive and safe use of technologies After two decades of educational policies we continue to reduce digital literacy to instrumental skills That is you do not learn why to use educational technologies and how or to be critical of their use Education 4.0 seeks to develop and enhance the digital skills of students and teachers in digital teaching environments through the creation of a line of academic training programs for undergraduate postgraduate and continuing education This article collection welcomes contributions to improve training policies and practices in Educational Digital Transformation for educational development strategies activities proposals for assessment and certification of skills

The Responsive University and the Crisis in South Africa, 2021-05-31 Around the world higher education is faced with a fundamental question what is the basis for our claim of societal legitimacy In this book the authors go beyond the classical response regarding teaching research and community engagement Instead the editor puts forward the proposition that the answer lies in responsiveness the extent to which universities respond or fail to respond to societal challenges Moreover because of its intractable legacy issues and crisis of inequality the question regarding the societal legitimacy of universities is particularly

clearly manifested in South Africa one of the most unequal countries in the world The Responsive University brings together contributions on the issue of responsiveness from a number of international university leaders half of them specifically addressing the South African situation within the context of the international situation as presented by the other authors In the global discussion about the role of universities in society this book provides a conceptual framework for a way forward

Reflections of South African University Leaders: 1981 to 2014 Council on Higher Education, 2016-03-17 Much has been written about the ever growing demands on university leadership worldwide in the face of increasingly complex changes and challenges from within the academy and beyond However as we are reminded by Johan Muller in the Introduction to this book there are particular features of time and place that also throw up unique problems It is precisely time and place that make this set of reflections by university leaders quite remarkable and distinguishes it from the many biographies to be found in the literature on higher education leadership In the main this collection spans two decades the 1990s and 2000s of unprecedented levels of change in South African higher education Leaders in universities as well as those responsible for higher education policy in the government and associated statutory bodies had no neat script to work off nor manuals or prescripts of good leadership or practice Instead there was palpable excitement about collectively imagining and nurturing a new post apartheid higher education system which would contribute to the social and economic development needs of the country the deepening of democracy and which would also be globally relevant Most reflections touch on the coalface of leadership which is the face to face interactional dimension dealing with staff with students with council chairs What comes through clearly is the importance of what are sometimes called people skills In these accounts this is not simply presented as a human relations aptitude for a number of reasons first of which is the special nature of universities and their occupants More than one points out the special challenge of managing the talented people that are academics and their inbuilt distaste for bureaucracy their reluctance to be managed or told what to do The message here is consistently one of needing to be completely open with academics the importance of maintaining the distinction between collegial and executive management avoiding managerialism and the critical importance of winning and holding their trust The inspiration for this collection arose in late 2013 in the Council on Higher Education's CHE Monitoring and Evaluation Directorate the directorate responsible for conducting research on the higher education landscape and monitoring the state of the sector They noted that conditions besetting universities had grown increasingly complex both globally but more especially locally and the question arose how had this altered the challenges to university leadership over the period between the new political dispensation and the second decade of the new millennium More particularly how had leaders with a proven track record of visionary and strong leadership during this period faced these challenges How did they see the main changes that needed dealing with What challenges did these changes pose and how were they successfully overcome What did they think looking back were the main constituents of successful leadership and management What wisdom could be distilled for posterity The Directorate decided

to invite a range of vice chancellors and senior academic leaders who had completed their terms of office to contribute to a project that set out to gather such reflections and compile them into a publication **Handbook of Research on Software for Gifted and Talented School Activities in K-12 Classrooms** Ikuta, Shigeru, 2019-12-27 As technology continues to play a pivotal role in society education is a field that has become heavily influenced by these advancements New learning methods are rapidly emerging and being implemented into classrooms across the world using software that is low cost and easy to handle These tools are crucial in creating skillful learning techniques in classrooms yet there is a lack of information and research on the subject The Handbook of Research on Software for Gifted and Talented School Activities in K 12 Classrooms is an essential reference source that discusses newly developed but easy to handle and less costly software and tools and their implementation in real 21st century classrooms worldwide The book also helps and supports teachers to conduct gifted and talented school activities in K 12 classrooms Featuring research on topics such as educational philosophy and skillful learning techniques this book is ideally designed for software developers educators researchers psychologists instructional designers curriculum developers principals academicians and students seeking coverage on the emerging role that newly developed software plays in early education
