

Important Safety Instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
4. Do not use this product near water (for example, near a bath tub, kitchen sink, or swimming pool).
5. Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation. To protect it from overheating, these openings must not be blocked by placing the product on the bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register. This product should not be placed in a built-in installation where proper ventilation is not provided.
7. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be abused by persons walking on it.
9. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product.
10. To reduce the risk of electric shock, do not disassemble this product, but take it to an authorized service facility. Opening or removing cabinet parts other than specified access doors may expose you to dangerous voltages or other risks. Incorrect reassembling can cause electric shock when the appliance is subsequently used.
11. Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.

Z. Naser, 2023-10-18

The past few years have demonstrated how civil infrastructure continues to experience an unprecedented scale of extreme loading conditions i.e. hurricanes, wildfires, and earthquakes. Despite recent advancements in various civil engineering disciplines specific to the analysis, design, and assessment of structures, it is unfortunate that it is common nowadays to witness large-scale damage in buildings, bridges, and other infrastructure. The analysis, design, and assessment of infrastructure comprises of a multitude of dimensions spanning a highly complex paradigm across material sciences, structural engineering, construction, and planning, among others. While traditional methods fall short of adequately accounting for such complexity, fortunately, computational intelligence presents novel solutions that can effectively tackle growing demands of intense extreme events and modern designs of infrastructure, especially in this era where infrastructure is reaching new heights and serving larger populations with high social awareness and expectations. Computational Intelligence for Analysis, Design, and Assessment of Civil Infrastructure highlights the growing trend of fostering the use of CI to realize contemporary smart and safe infrastructure. This is an emerging area that has not fully matured yet, and hence the book will draw considerable interest and attention. In a sense, the book presents results of innovative efforts supplemented with case studies from leading researchers that can be used as benchmarks to carry out future experiments and/or facilitate development of future experiments and advanced numerical models. The book is written with the intention to serve as a guide for a wide audience, including senior postgraduate students, academic and industrial researchers, materials scientists, and practicing engineers working in civil, structural, and mechanical engineering. Presents the fundamentals of AI, ML, and how they can be applied in civil and environmental engineering. Shares the latest advances in explainable and interpretable methods for AI, ML, in the context of civil and environmental engineering. Focuses on civil and environmental engineering applications, day-to-day, and extreme events, and features case studies and examples covering various aspects of applications. **Who's who in America**, 1924 **Information Security Applications** Brent ByungHoon Kang, Taesoo Kim, 2018-06-22

This book constitutes the thoroughly refereed post-conference proceedings of the 18th International Conference on Information Security Applications (WISA 2017) held on Jeju Island, Korea, in August 2017. The 12 revised full papers and 15 short papers presented in this volume were carefully reviewed and selected from 53 submissions. The papers are organized in topical sections such as attack and defense theory, in security, web security, and emerging technologies, systems security, and authentication, crypto protocols, and attack detections, and legal aspects.
