Environmental control systems are the components of a building that keep occupants comfortable and help make the building work. Mechanical and Electrical Equipment for Buildings covers both active controls like air conditioners and heaters as well as passive controls like daylighting and natural ventilation. Because these systems comprise the entire energy use and costs of a building's life, the book stresses the importance of sustainability considerations during the design process by both architects and builders. Authored by two leading green design educators, MEEB provides the most current information on low energy architecture including topics like Context, comfort and environmental resources, Indoor air quality and thermal control, Illumination, acoustics and electricity, Fire protection, signal systems and transportation. Occupant comfort and building usability are the most critical factors in the success of a building design and with environmental concerns mounting, it's becoming more and more important to approach projects from a sustainable perspective from the very beginning. As the definitive guide to environmental control systems for over 75 years, Mechanical and Electrical Equipment for Buildings is a complete resource for students and professionals alike.

HVAC Equations, Data, and Rules of Thumb, Third Edition Arthur A. Bell, W. Larsen Angel, 2015-12-22. This comprehensive volume often called the HVAC bible has been thoroughly updated to cover the latest code changes, equipment and techniques. HVAC Equations, Data and Rules of Thumb 3e offers all of the information an HVAC student or professional needs in one resource. The book thoroughly explains the expansion of piping systems and temperature limitations of new materials such as polyethylene, polypropylene, PVC, CPVC and PEX. Detailed information is included for all types of facilities including offices, hotels, hospitals, restaurants, commercial spaces and computer rooms. This practical handbook reflects all the latest code changes including the ASHRAE standards and explains how to interpret and put them to use. It includes completely updated coverage of new pumps, chillers, air handling units, cooling equipment, boilers and pipe material. You will get complete coverage of sustainability organizations that have become more important since last edition including LEED, USGBC, Energy Star. Features hundreds of equations and rules for everything from ductwork to air handling systems. Includes a brand new chapter on sound, vibration and acoustics. Contains an updated list of equipment manufacturers for all products featured.
