ICEL 2018 13th International Conference on e-Learning Professor Eunice Ivala, 2018-07-05 **Instant Insights: Managing arthropod pests in tree fruit** Dr Giuseppe E. Massimino Cocuzza, Prof. Arthur Agnello, Dr Elizabeth H. Beers, Dr Matthew J. Grieshop, 2023-01-24 This collection features four peer-reviewed reviews on managing arthropod pests in tree fruit. The first chapter provides a brief overview of the major aphid pests affecting tree fruit production, focussing on those causing economic damage in citrus, apple, pear, and stone fruit production. The chapter considers the techniques available for their control and looks ahead to future research in this area. The second chapter addresses the complex issue of managing and controlling arthropod pests in tree fruit production in the face of increasing pesticide regulatory restrictions, as well as public concerns about food safety and environmental impact. The chapter considers the need for a more basic understanding of pest biology and development which can then be used in predictive models to support the effective use of more selective and sustainable crop protection methods. The third chapter introduces key arthropod pests of apples and highlights the importance of integrated pest management (IPM) programmes in controlling infestations. The chapter reviews the tools and tactics available as part of a sustainable IPM programme, as well as current and future challenges facing IPM. The final chapter outlines key cultural tactics for managing arthropod pests in temperate tree fruit, including the modification of trees, tree architecture, orchard floor management, cultivation practices, mowing, and the cultivation of orchard cover crops.

Increasing Resilience to Climate Variability and Change Cecilia Tortajada, 2016-08-18 This book highlights the role that both infrastructure and governance play in the context of resilience and adaptation to climate variability and change. Eleven case studies analyze in depth impacts of extreme events in projects, basins, and regions in the Arid Americas, United States, and Mexico, Australia, Brazil, China, Egypt, France, Nepal, Mexico, Pakistan, Turkey, and South Africa. They discuss the importance of infrastructure, mainly reservoirs, in adaptation strategies, how planning and management aspects should improve in response to changing climatic, economic, social, and environmental situations, and what the management, institutional, and financial challenges would be for their implementation. Governance aspects, policies, institutions, and decision making, and technical and knowledge limitations are a substantial part of the analyses. The case studies argue that reservoirs are essential to build resilience, contributing to adaptation to climate variability and change. However, for them to be effective, they need to be planned and managed within a governance framework that considers long-term perspectives and multi-sector and
