significantly burden health care systems Mammals including humans with PNIs experience 1 immediate loss of sensory and motor functions mediated by the denervated target tissues 2 rapid 3 7d Wallerian Degeneration WD of severed distal axonal segments and 3 slow 1mm day regeneration by naturally occurring axonal outgrowths from surviving severed proximal stumps that produce poor if any functional recovery because of slow axonal regeneration for long distances and lack of axonal guidance Denervated muscle fibers and sensory organs often atrophy before any re innervation can occur

*Fundamentals of Neurophysiology* Robert F. Schmidt, 2013-04-17 Although just two years have passed since the first English edition of this book advances in neurophysiology have dictated considerable revision of most of the chapters The chapters on synaptic transmission motor systems and the autonomic nervous system for example have been revised extended and in some parts entirely rewritten In response to a frequently expressed wish a chapter on the integrative functions of the nervous system has been added Here the use of the term integrative functions expresses our lack of a better general term covering such diverse activities and states of the nervous system as waking sleeping dreaming consciousness speech learning and memory This chapter also includes an introduction to the physiology of the cerebral cortex and the characteristics of the electroencephalogram Another new section is a chapter on the control systems aspects of central nervous activity a reflection of the fact that many processes particularly those involving motor activity and the autonomic nervous system can best be described and analyzed in terms of control theory The previous Chapter 7 Sensory Systems has been largely included in another volume *Fundamentals of Sensory Physiology* Finally again at the suggestion of readers a bibliography has been added to guide the student further into the topics of the individual chapters Most of the references are recent they offer access to the current original literature
