New Century Maths for the Australian Curriculum 10 Klaas Bootsma, David Badger, Sarah Hamper, 2014

New Century Maths 11 Margaret Willard, Robert Yen, 2013

The new Mathematics General syllabus describes two pathways that start in Year 11. Even though both pathways share a common Preliminary course, students taking each pathway have specific learning needs so we have published two levels of text for both Years 11 and 12. First published in 2000 and revised in 2009, New Century Maths 11 Pathway 2 has been revised again for the new Mathematics General course commencing in NSW in 2013. This book is produced especially for students who have completed some or all of Stage 5.2 especially in algebra and trigonometry and are heading towards the Mathematics General 2 HSC course in Year 12 ATAR and university study. This is the more traditional and academic pathway of the updated course. The printed book is supported by an interactive NelsonNetBook version of the text. Students and teachers will have access to a range of useful resources on the password protected NelsonNet website. To download a sample chapter, a Driving safely, click the Download Sample Material button. The corresponding Year 12 text, New Century Maths 12 General Mathematics 2 HSC Course, will be available in mid 2013. Philosophy in the New Century (Continuum Compact) Anthony O'Hear, 2004-01-01

In this powerful re-examination of the purpose and direction of philosophy for the next century, Anthony O'Hear engages with our most pressing questions: Is there knowledge outside of science? Does religion still have meaning and coherence today? What is beauty and why do so few contemporary artists believe in it? Contemporary philosophy mostly divides into the technical approach of the Anglo-Americans which is inaccessible to most and the oracular obscurantism of the Continental approach which does violence to sense and reason. O'Hear argues that philosophy should work with the grain of tradition and commonsense to understand politics, religion, aesthetics and the vast number of ethical questions that will continue to arise as the scientific and technical revolution accelerates. Giving up philosophy's special position means giving up our best chances of thinking and acting wisely. In making a strong case for the relevance of philosophy, Anthony O'Hear presents a coherent and compelling vision for recovering wisdom in our time.
