Traffic Safety Materials Catalog , Traffic Safety Materials Catalog, 1996 ,1996 **Applied Deep Learning and Computer Vision for Self-Driving Cars** Sumit Ranjan, Dr. S. Senthamilarasu, 2020-08-14 Explore self driving car technology using deep learning and artificial intelligence techniques and libraries such as TensorFlow Keras and OpenCV

Key Features Build and train powerful neural network models to build an autonomous car Implement computer vision deep learning and AI techniques to create automotive algorithms Overcome the challenges faced while automating different aspects of driving using modern Python libraries and architectures

Book Description Thanks to a number of recent breakthroughs self driving car technology is now an emerging subject in the field of artificial intelligence and has shifted data scientists focus to building autonomous cars that will transform the automotive industry This book is a comprehensive guide to use deep learning and computer vision techniques to develop autonomous cars Starting with the basics of self driving cars SDCs this book will take you through the deep neural network techniques required to get up and running with building your autonomous vehicle Once you are comfortable with the basics you ll delve into advanced computer vision techniques and learn how to use deep learning methods to perform a variety of computer vision tasks such as finding lane lines improving image classification and so on You will explore the basic structure and working of a semantic segmentation model and get to grips with detecting cars using semantic segmentation The book also covers advanced applications such as behavior cloning and vehicle detection using OpenCV transfer learning and deep learning methodologies to train SDCs to mimic human driving By the end of this book you ll have learned how to implement a variety of neural networks to develop your own autonomous vehicle using modern Python libraries What you will learn Implement deep neural network from scratch using the Keras library Understand the importance of deep learning in self driving cars Get to grips with feature extraction techniques in image processing using the OpenCV library Design a software pipeline that detects lane lines in videos Implement a convolutional neural network CNN image classifier for traffic signal signs Train and test neural networks for behavioral cloning by driving a car in a virtual simulator Discover various state of the art semantic segmentation and object detection architectures Who this book is for If you are a deep learning engineer AI researcher or anyone looking to implement deep learning and computer vision techniques to build self driving blueprint solutions this book is for you Anyone who wants to learn how various automotive related algorithms are built will also find this book useful Python programming experience along with a basic understanding of deep learning is necessary to get the most of this book
