INTRODUCTION

This area contains component information about the singlewide Model 7300 Non-Invasive Blood Pressure (NIBP) Module. The singlewide NIBP module monitors blood pressure noninvasively, using the oscillometric method that measures the amplitude of the pressure oscillations within the blood pressure cuff. Systolic pressure, diastolic pressure, mean arterial pressure, and cuff pressure are all measured by the module. Heart rate values are also derived from the pulse rate determined by the oscillometric blood pressure measurement technique.
