**Democracy of Sound** Alex Sayf Cummings, 2017 Democracy of Sound tells the story of the pirates radicals jazzbos Deadheads and DJs who challenged the record industry for control of recorded sound throughout the twentieth century A political and cultural history it shows how the primacy of

intellectual property gradually eclipsed an American political tradition that was suspicious of monopolies and favored free competition      *Global Fragments* Anke Bartels,Dirk Wiemann,2007 While the world seems to be getting ever smaller and globalization has become the ubiquitous buzz word regionalism and fragmentation also abound This might be due to the fact that far from being the alleged production of cultural homogeneity the global is constantly re defined and altered through the local This tension pervading much of contemporary culture has an obvious special relevance for the new varieties of English and the literature published in English world wide Postcolonial literatures exist at the interface of English as a hegemonic medium and its many national regional and local competitors that transform it in the new English literatures Thus any exploration of a globalization of cultures has to take into account the fact that culture is a complex field characterized by hybridization plurality and difference But while global or transnational cultures may allow for a new cosmopolitanism that produces ever changing fluid identities they do not give rise to an egalitarian global village an asymmetry between centre and periphery remains largely intact albeit along new parameters The essays collected in this volume offer readings of literary theoretical and filmic texts from the postcolonial world These texts are read as attempts to articulate the global with the local from a perspective of immersion in the actual diversity of life worlds focusing on such issues as consumption identity politics and modes of affiliation In this sense they are global fragments locally refracted figurations of an experience of world wide interconnectedness      *What's It Like? how the various technologies enabling the transmission or storing of sound and voice are figured in selected prose works Drawing from contemporary American British French and German literature the author discusses these use of these technologies in Nicholson Baker s *Vox* Michel Tournier s *Tristan* Vox Heinrich B ll s *Murke s Collected Silences* Don DeLillo s *The Body Artist* Nick Hornby s *High Fidelity* and Sylvia Brownrigg s *The Metaphysical Touch* The texts foreground sound technologies the telephone radio tape recorder answering machine record player or counterintuitively e mail in their narration and manifest important aspects of audio in literature In prior criticism these texts have not been systematically read from media technological perspectives The sound technologies represented in the texts problematize the clear distinction between speech and writing or between natural articulation and its technological reproduction Audio Book suggests that literary writing is metaphorically conceivable as a transmitting and storing technology as an audiobook of sorts capable of recording upon writing and reproducing upon reading auditory information The sound technologies proper have also bearing on the narrative structure metaphors and style of each fictional work studied in Audio Book In addition themes such as identity genre the nature of literary representation and the absence presence problem are brought to the fore on account of the technologies depicted
