on the history of the English urban environment that will appeal to both general readers and academic specialists The emphasis throughout is emphatically that of the historian rather than the physical geographer that is a primary focus on the people who make the landscapes the changing social structure of the communities and the different economies which sustained them The text is enhanced by 130 integrated illustrations including half tones and diagrams The thirteen chapters

combine chronological and thematic surveys After a general introduction by Dr Waller chapters 2 5 provide overviews of how the urban landscape in England developed during the Roman period the Early Medieval period the Medieval period and the Early Modern Period The second larger part of the text offers a variety of thematic approaches to the history of the built environment with a focus on the last two centuries metropolitanism the commercial city the industrial city transport slums and suburbs recreation civil and ecclesiastical and artistic and literary In addition there are a number of cameo features throughout the text eg on a small market town a garden city a council estate the Potteries There is a list of further reading on each chapter The Oxford Handbook of Zooarchaeology Umberto Albarella, Mauro Rizzetto, Hannah Russ, Kim
