Product Standards, Exports and Employment

Rajat Acharyya,2006-03-30 Through the process of globalization the trade dependence and int dependence of the developing countries have increased phenomenally than ever before The characteristic of this late twentieth century globalization process has been the new technological revolution that has led to a high rate of world exports of electronics and other high technology products This has marginalized most of the developing countries exporting largely the low quality and low value addition manufacturing and primary products barring a few exceptions like China India and Mexico The fruits of globalization have therefore been unevenly distributed so far across the developed and the developing countries Moreover whatever little growth in exports of medium technology products has been achieved by a few of them is largely driven by outsourcing of low value addition and low stage of activities by the foreign multinationals Outsourcing of software services rather than development of software packages in India and assembly line for automobiles in Mexico are the two glaring examples These activities may have boosted the total exports of these countries but they have failed to generate any feedback effect on the rest of the economy in terms of skill formation increase in overall productivity level and product diversification Prostate Cancer Sam S. Chang,Michael S. Cookson,2018-05-10 Prostate cancer is the most frequent genitourinary malignancy that garners significant medical and media attention Over the past decade significant new discoveries have been made that have enabled substantial improvements in screening diagnosis and management of this disease Importantly there has been constant evolution of the best way to treat these patients This text will provide a single comprehensive reference source that incorporates all the latest information regarding prostate cancer It will serve as an easy reference source for researchers clinicians individuals in training allied health professionals and medical students regarding prostate cancer by focusing on the controversial points of debate New data regarding PSA screening prostate cancer biomarkers diagnostic evaluation techniques surveillance protocols and treatment interventions for localized and more advanced disease will be discussed Gaps in current knowledge and areas for future research will be highlighted Ongoing important clinical trials which could imminently yield significant new knowledge will be discussed Uniquely to all of the above will be the clinical scenario based format of this text For the practicing physician the prostate cancer screening and treatment situations will hopefully become better understood We will incorporate key educational concepts in the framework of patient situations with evidence based discussions of screening diagnosis evaluation and therapeutic management To provide even more insight we plan on a comment section from leaders in the field that will be more opinion based allowing the reader to get access to experienced physicians thought processes and practice patterns All chapters will be authored by experts in their respective fields and incorporate original figures and illustrations to the extent possible We anticipate that this book will quickly become the ready reference source for professionals and students in various fields with an interest in the management of a complex and multifaceted disease such as prostate cancer The book will be comprehensive and encompass the entire the spectrum of prostate cancer The information will be presented in a succinct and easily understandable manner so as to appeal to both
