*Holonic and Multi-Agent Systems for Manufacturing* Vladimir Marik, Thomas Strasser, Alois Zoitl, 2009-08-25 The research of holonic and agent based systems is developing very rapidly The community around this R & D topic is also growing fast despite the fact that the real life practical implementations of such systems are still surprisingly rare However the managers in different branches of industry feel that the holonic and agent based systems represent the only way of managing and controlling very complex highly distributed systems exploring vast volumes of accumulated knowledge The relevant research and development activities gain more and more visible support from both industry as well as public sectors Quite naturally the number of scientific events aimed at the subject field is also growing rapidly We see new lines of conferences like INDIN we observe a strong focus of the already well established conferences e.g. INCOM or ETFA being shifted toward holonic and agent based manufacturing systems We see an increased interest of the IEEE System Man and Cybernetics Society especially its Technical Committee on Distributed Intelligent Systems which leverages the experience gathered by the members of the former Holonic Manufacturing Systems HMS consortium We see a clear orientation of the

IEEE SMC Transactions part C toward applications of agent oriented solutions The same is true of the International Journal on Autonomous Agents and Multi Agent Systems JAAMAS This is a really good sign of the increasing importance of the field

Groupware: Design, Implementation, and Use Jörg M. Haake,Jose A. Pino,2002-08-14 Welcome to the 8th International Workshop on Groupware CRIWG 2002 The previous workshops took place in Lisbon Portugal 1995 Puerto Varas Chile 1996 El Escorial Spain 1997 B zios Brazil 1998 Cancun Mexico 1999 Madeira Portugal 2000 and Darmstadt Germany 2001 CRIWG workshops follow a simple recipe for success good papers a small number of participants extensive time for lively and constructive discussions and a high level of cooperation both within and between paper sessions CRIWG 2002 continued this tradition CRIWG 2002 attracted 36 submissions from 13 countries nine

of them outside Ibero America Each of the 36 articles submitted was reviewed by at least three members of an internationally renowned Program Committee This year we used a double blind reviewing process i e the reviewers did not know who the authors of the papers were In addition the reviewers were chosen based on their expertise and we also ensured that they came from countries and institutions not related to those of the paper s authors This reviewer assignment worked remarkably well as indicated by the high average confidence value the reviewers gave their own reviews This means that papers were usually reviewed by experts in the paper s topic As a consequence reviews were usually quite extensive and contained many suggestions for provements I would like to thank all the members of the Program Committee for their hard work which I am sure contributed to improving the quality of the final articles
