Decolonisation after

Democracy Laurence Piper, 2020-05-21 Decolonisation after Democracy addresses the provocative idea that we need to rid higher education of lingering forms of colonial knowledge. This matters because in the colonial era much knowledge was put to the service of subjugating indigenous peoples and the assumptions from this era may linger into the present. Examples of deep rooted and foundational forms of knowledge that carry colonial traits are normative binaries such as civilised and backward modern and traditional and rational and superstitious. In addition some accounts of positive values like freedom equality justice and democracy may hide the assumption that the western experience is the norm from which other kinds are rendered imitations deviations or pathologies. In this collection some of South Africa's leading political scientists and academics engage with the challenge of decolonising knowledge in the research and teaching of politics. It includes new insights about the state international relations clientelism state-society relations and land reform and introduces new ways to engage the colonial library curriculum reform and the marginality of historically black institutions. Finally the contributors deal with the decolonial challenge posed by the FeesMustFall student movements reflecting on issues of revolutionary politics and gender and sexual violence. This book was originally published as a special issue of *Politikon*.

Violence,

Politics and Conflict Management in Africa Munyaradzi Mawere, Ngonidzashe Marongwe, 2016-09-01 This volume critically interrogates from different angles and dimensions the resilience of conflict and violence into 21st century Africa. The demise of European colonial administration in Africa in the 1960s wielded fervent hope for enduring peace for the people of Africa. Regrettably conflict alongside violence in all its dimensions physical religious political psychological and structural remain unabated and occupy central stage in contemporary Africa. The resilience of conflict and violence on the continental

scene invokes unsettling memories of the past while negatively influencing the present and future of crafting inclusive citizenship and statehood The book provides fresh insightful ethnographic and intellectual material for rethinking violence and conflict and for fostering long lasting peace and political justice on the continent and beyond With its penetrating focus on conflict and associated trajectories of violence in Africa the book is an inestimable asset for conflict management practitioners political scientists historians civil society activists and leaders in economics and politics as well as all those interested in the affairs of Africa

International Schools Mary Hayden, Jeff Thompson, 2016-03-01 The foundation of the first international schools of the modern era well over a century ago and their burgeoning growth over recent years provides the context in this book for a series of personal perspectives written by some of those who have been involved centrally in their development As the schools themselves have increased not only in number and geographical distribution but also in diversity of style and ownership so have a range of complex issues arisen relating to their fundamental purposes the curricula that they choose what should be taught and what should be learned the nature of their organization including leadership and management and their potential contributions in responding to a perceived global need and in influencing the promotion of international education in national systems of schools The distinguished group of authors contributing to this volume identify the current issues surrounding the rapid evolution of international schools and likely future directions of development based on their own impressive personal and professional experience of the sector That both comparative and international education genres are to be found in approaches taken in the various chapters means that the book will be of interest and value not only to teachers in international schools but also to those working in national schools and to researchers in colleges and universities worldwide

Food and Nutrition Security in Southern African Cities Bruce Frayne,Jonathan Crush,Cameron McCordic,2017-12-22

Urban population growth is extremely rapid across Africa and this book places urban food and nutrition security firmly on the development and policy agenda It shows that current efforts to address food poverty in Africa that focus entirely on small scale farmers to the exclusion of broader socio economic and infrastructural approaches are misplaced and will remain largely ineffective in ameliorating food and nutrition insecurity for the majority of Africans Using original data from the African Food Security Urban Network s AFSUN extensive database it is demonstrated that the primary food security challenge for urban households is access to food Already linked into global food systems and value chains Africa s supply of food is not necessarily in jeopardy Rather the widespread poverty and informal urban fabric that characterizes Africa s emerging cities impinge directly on households capacity to access food that is readily available Through the analysis of empirical data collected from 6 500 households in eleven cities in nine countries in Southern Africa the authors identify the complexity of factors and dynamics that create the circumstances of widespread food and nutrition insecurity under which urban citizens live They also provide useful policy approaches to address these conditions that currently thwart the latent development potential of Africa s expanding urban population
