The Oxford Handbook of Late Colonial Insurgencies and Counter-Insurgencies Martin Thomas, Gareth Curless, 2023-10-10 The lethality of conflicts between insurgent groups and counter insurgent security forces has risen markedly since the Second World War just as those of conventional or inter state wars have declined For several decades conflicts within states rather than between them have been the prevalent form of organised political violence worldwide Recent conflicts in Afghanistan Iraq and Syria have fired interest in colonial experiences of rebellion while current western interventions in sub Saharan Africa have prompted accusations of militarist humanitarianism Yet despite mounting interest in counter insurgency and empire comparative investigation of colonial responses to insurrection and civil disorder is sparse Some scholars have written of a golden age of

counter insurgency which began with Britain's declaration of a Malayan Emergency in 1948 and ended with the withdrawal of US ground troops from Vietnam in 1973. It is with this period, if not with any presumed golden age, that this volume is concerned. This Handbook connects ideas about contested decolonization and the insurgencies that inspired it with an analysis of patterns and singularities in the conflicts that precipitated the collapse of overseas empires. It attempts a systematic study of the global effects of organized anti-colonial violence in Asia and Africa. The objective is to reconceptualize late colonial violence in the European overseas empires by exploring its distinctive character and the globalizing processes underpinning it. **The Oxford Handbook of Music and World Christianities** Suzel Ana Reily, Jonathan M.

Dueck, 2016-03-25. The Oxford Handbook of Music and World Christianities investigates music's role in everyday practice and social history across the diversity of Christian religions and practices around the globe. The volume explores Christian communities in the Americas, Europe, Africa, Asia, and Australia as sites of transmission, transformation, and creation of deeply diverse musical traditions. The book's contributors, while mostly rooted in ethnomusicology, examine Christianities and their musics in methodologically diverse ways, engaging with musical sound and structure, musical and social history, and ethnography of music and musical performance. These broad materials explore five themes: music and missions; music and religious utopias; and other oppositional religious communities; music and conflict; music and transnational flows; and music and everyday life. The volume as a whole then approaches Christian groups and their musics as diverse and powerful windows into the way in which music, religious ideas, capital, and power circulate and change between places, now and historically. It also tries to take account of the religious self-understandings of these groups, presenting Christian musical practice and exchange as encompassing and negotiating deeply felt and deeply rooted moral and cultural values. Given that the centerpiece of the volume is Christian religious musical practice, the volume reveals the active role music plays in maintaining and changing religious moral and cultural values in a long history of intercultural and transnational encounters.

Digital Work and the Platform Economy Seppo Poutanen, Anne Kovalainen, Petri Rouvinen, 2019-11-28. Uberization, digitalization, platform economy, gig economy, and sharing economy are some of the buzzwords that characterize the current intense discussions about the development of the economy and work around the world among both experts and laypersons. Immense changes in the ways goods are manufactured, business is done, work tasks are performed, education is accomplished, and so on are clearly underway. This also means that demand for careful, first-rate social scientific analyses of the phenomena in question is rapidly growing. This edited volume gathers distinguished researchers from economics, business studies, organization studies, medicine, social psychology, occupational health, pedagogics, and sociology to put particular work in both public and private sectors and education in both academic and vocational settings at the focus of the emerging digitalized platform economy. The authors anchor their analyses and conceptual and theoretical work in distinctive empirical developments that are taking place in one of the leading countries of digitalization processes: Finland. Finnish case studies

reflect general global developments and show their particular context related actualization in multiple ways This double exposure enables the authors of this multi and interdisciplinary volume to advance conceptualization and theorization of the key phenomena in digitalizing platform societies in novel creative and groundbreaking directions This book will without doubt be of great value to academic researchers and students in the fields of economics business studies work studies social sciences education technology digitalization platforms occupational health entrepreneurship and professions
