Validating Clinical Trial Data Reporting With Sas:

Validating Clinical Trial Data Reporting with SAS Carol I. Matthews, Brian C. Shilling, 2008 This indispensable guide focuses on validating programs written to support the clinical trial process from after the data collection stage to generating reports and submitting data and output to the Food and Drug Administration

Validating Clinical Trial Data Reporting with SAS (Hardcover Edition) Carol I. Matthews, Brian C. Shilling, 2008-03-17 Validation is a critical component to programming clinical trial analysis Essential to effective validation is the programmer's understanding of the data with which they'll be working If you don't understand how the data is arranged the values that are reasonable for each variable and the way the data should behave you cannot ensure that the final result of your programming effort is complete or even appropriate Therefore to be a successful programmer in the pharmaceutical industry you need to understand validation requirements and to learn how to make the code do the bulk of the work so that your programs are efficient as well as accurate This indispensable guide focuses on validating programs written to support the clinical trial process from after the data collection stage to generating reports and submitting data and output to the Food and Drug Administration FDA Authors Carol Matthews and Brian Shilling provide practical examples explanations for why different techniques are helpful and tips for avoiding errors in your output Topics addressed include Validation and pharmaceutical industry overviews Documentation and maintenance requirements discussions General techniques to facilitate validation Data importing and exporting Common data types Reporting and statistics Validating Clinical Trial Data Reporting with SAS is designed for SAS programmers who are new to the pharmaceutical industry as well as for those seeking a good foundation for validation in the SAS programming arena Readers should have a working knowledge of Base SAS and a basic understanding of programming tasks in the pharmaceutical industry

SAS Programming in the Pharmaceutical Industry, Second Edition Jack Shostak, 2014-03-01 This comprehensive resource provides on the job training for statistical programmers who use SAS in the pharmaceutical industry This one stop resource offers a complete review of what entry to intermediate level statistical programmers need to know in order to help with the analysis and reporting of clinical trial data in the pharmaceutical industry SAS Programming in the Pharmaceutical Industry Second Edition begins with an introduction to the pharmaceutical industry and the work environment of a statistical programmer Then it gives a chronological explanation of what you need to know to do the job It includes information on importing and massaging data into analysis data sets producing clinical trial output and exporting data This edition has been updated for SAS 9.4 and it features new graphics as well as all new examples using CDISC SDTM or ADaM model data structures Whether you're a novice seeking an introduction to SAS programming in the pharmaceutical industry or a junior level programmer exploring new approaches to problem solving this real world reference guide offers a wealth of practical suggestions to help you sharpen your skills This book is part of the SAS Press program
