Biomedical Image Registration Bernd Fischer, 2010 Welcome to the proceedings of the 4th Workshop on Biomedical Image Registration WBIR. Previous WBIRs took place in Bled, Slovenia 1999 at the University of Pennsylvania USA 2003 and in Utrecht, The Netherlands 2006. This year WBIR was hosted by the Institute Mathematics and Image Processing and the Fraunhofer Project Group on Image Registration and it was held in Lubbeck, Germany. It provided the opportunity to bring together researchers from all over the world to discuss some of the most recent advances in image registration and its applications. We had an excellent collection of papers that were reviewed by at least three reviewers each from a 35 member Program Committee assembled from a worldwide community of registration experts. This year 17 papers were accepted for oral presentation while another 7 papers were accepted as poster papers. We believe all of the conference papers were of excellent quality. Registration is a fundamental task in image processing used to match two or more pictures taken for example at different times from different sensors or from different viewpoints. Establishing the correspondence of structures within medical images is fundamental to diagnosis, treatment planning and surgical guidance. The conference papers address state of the art techniques for providing reliable and efficient registration techniques thereby imposing relationships between specific application areas and appropriate registration schemes. We are grateful to all those who contributed to the success of WBIR 2010.

Medical Imaging 2004 Amir A. Amini, Armando Manduca, 2004 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics. These books provide prompt access to the latest innovations in research and technology in their respective fields. Proceedings of SPIE are among the most cited references in patent literature. Medical Imaging 2004, 2004 **CARS 2004** H. U. Lemke, Heinz U. Lemke, 2004 Almost 500 paper and poster contributions from more than 30 countries had to be evaluated for CARS 2004. In addition to the traditional CARS themes and topics, emphasis has been given to developments such as IHE Surgical Workflow and PACS Operation Room of the Future and Strategic Thinking. In special congress sessions, partner societies such as SPIE and SCAR have joined these endeavours to assist in achieving progress in these fields. While

the increased reliance on multi source information is proceeding at a rapid rate it is interesting to note that the basis for the greater part of medical decision making is still medical imaging This may change as genomics and proteomics fulfil more of their potential but it is estimated that more than half of current hospital visits result in imaging studies In that respect it is true that the more things change the more they stay the same Alphonse Karr 1849 and that medical imaging is the cornerstone of the field This focus on medical imaging is evident throughout the CARS conference with sessions dedicated to Medical Imaging MI itself Image Processing and Display IPD Image Guided Radiological Therapy IGRT Image Guided Therapy IGT and separate symposia on Computer Aided Diagnosis based on imaging and both Cardiovascular and Maxillofacial Imaging Still it is up to you the engineers scientists clinicians and related personnel participating in CARS to ensure that innovation in technology and procedures is not developed just for the sake of change but instead to achieve progress and thereby provide better patient care
