SAFETY

Parts of the switch carry mains power, which is a potential hazard. Follow safety rules during installation and use. Always read these safety instructions before installing, maintaining or carrying the switch, and always comply with these instructions.

- If you are unsure about any part of these installation instructions, consult a qualified electrician.
- The device is designed for indoor use only.
- Do not expose the product to rain or moisture, to avoid short circuits. Short circuits may cause fire or electric shock hazard.
- Connect the device to a power source (120V AC or 277V AC) and ground it.
- Use only a suitably rated cable (e.g. 1.5mm² or 18 AWG).
- The product is not intended for use in hazardous areas.
- The product must be made impervious and secured against tampering. The device must be secured or replaced as soon as possible. Safety is likely to be impaired if, for example, the equipment fails to perform its intended function or if the equipment shows visible damage.
- Do not plug the device.

- **Switch only**
 - Disconnect power at circuit breaker or fuse when working.
 - Use the switch only with copper or copper clad wire.
 - Connect the switch to the power source according to the wiring diagram in this manual.

- **Sensor only**
 - The sensor cannot be used to control any load without a compatible switch.
 - Use only high-quality 3.6V lithium-thionyl chloride batteries with the sensor (see 3.6V lithium-thionyl chloride (GMR, 3.6V)). Using improperly rated batteries may damage the sensor.
 - Dispose of used batteries properly. Keep batteries away from children, do not disassemble and do not dispose of in fire.

Install the switch

WARNING: Wiring the device with power ON could result in serious injury or death.

- 1 Remove power from the room or fuse or circuit breaker.
- 2 Remove the old switch, if needed.
- 3 Connect the wires according to the wiring diagram above.

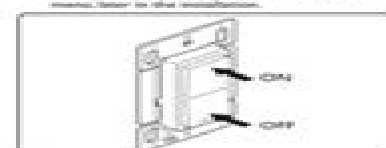

- 4 Place the switch into the wall box, and fix it with the mounting plate.
- 5 Power the mains at fuse or circuit breaker.

4 For a three-way circuit, connect the wires as follows:

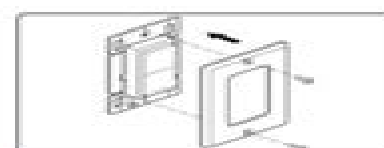

- The sensor switch (see below) contains the load according to the regular wiring diagram.
- The three-way switch (see below) contains the load according to the wiring diagram above. Make sure that the switch has a steady load (resistor and neutral).

- 5 Test that the switch is wired correctly using the rocker to turn the light ON/OFF.

- 6 If installing in a multiplex wall box, break the tabs of joining index (DIN rail) and break the outside tabs on sensors at the end of the gang.

- 7 Attach a wall plate adapter and wall plate. Wall plate and adapter must be purchased separately.

Install the sensor

Sensor placement guidelines

- The sensor should be mounted in such a way that:
 - Small movements are detected for the application.
 - Large movements are detected for the entire room, and in particular for the area near the doorway.
 - Motion from adjacent areas, e.g. the hallway is not picked up.
- The sensor of a room is usually not a good location. Placing the sensor towards the wall where the door is located may still cover the entire room, while blocking unwanted detection of motion from the hallway.
- The sensor should not be placed close to heat sources (especially incandescent lamps) or HVAC outlets.

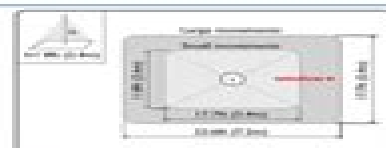

- 1 Set the dial on the sensor to 0 (clockwise for testing).
- 2 Place the battery into the sensor.

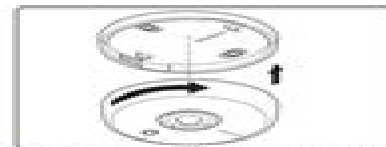

CAUTION: Only use a high-quality 3.6V lithium-thionyl chloride battery with the sensor. See SAFETY for more information on the battery.

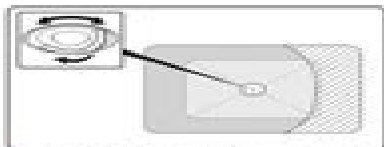

- 4 Fix the mounting plate onto the sensor's location, using the mounting hardware. Alternatively, use toggle bolts (not included).

- 3 Choose the sensor location on the ceiling. The sensor should be in the mounting plate before the direction of the detector field, which is rectangular. See Sensor placement guidelines for more information.

- 5 Place the sensor onto the mounting plate, and rotate clockwise to fix.

- 6 If needed, pull out the sensor shield (indicated on the ring with a dot), and rotate it in the required direction. This ring is covered to move (dial in Config, test & finish).
