Dapía,2015-08-20 Making an important contribution to studies in Literature and Philosophy this book reads Jorge Luis Borges philosophically particularly in reference to his use of representation and reality Rather than attempting to subordinate Borges to a set of philosophical

constructs to reduce Borges texts to mere exemplifications or illustrations of philosophical theories the book uses Borges s short stories to demonstrate how philosophical questions related to representation develop out of literature and actually serve as precursors to the various strains of post analytic philosophy that later developed in the United States The volume discusses American post analytic philosophers Richard Rorty Hilary Putnam Donald Davidson Nelson Goodman and Arthur Danto as well as a wide ranging set of philosophical ideas including reflections on Keynes Hayek Schopenhauer and many others Chapters offer detailed readings of Borges texts extending from 1939 to 1983 locating where he thematizes issues of representation and pursuing the logic of Borges s text toward its philosophical implications without neglecting their literary value The book argues that Borges exploration of the relationship between representation and reality places him unmistakably in the position of a precursor to the post analytic philosophers Illuminating the role that language plays in the creation of reality and representation this volume makes significant contributions not only to Borges scholarship but also post structuralism post analytic studies of language semiotics comparative literature and Latin American literature The Saturday Review of Politics, Literature, Science, Art, and Finance, 1860 **Dictionary of Twentieth-Century British Philosophers** Stuart Brown, 2005-06-01 This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture Philosophical Studies ,1941 Virtuoso by Nature: The Scientific Worlds of Francis Willughby FRS (1635-1672), 2016-05-03 Francis Willughby together with John Ray revolutionized the study of natural history. They were motivated by the new philosophy of the mid 1600s and transformed natural history in to a rigorous area of study Because Ray lived longer and more of his writings have survived his reputation subsequently eclipsed that of Willughby Now with access to previously unexplored archives and new discoveries we are able to provide a comprehensive evaluation of Francis Willughby s life and works What emerges is a polymath a true virtuoso who made original and

imaginative contributions to mathematics chemistry linguistics as well as natural history We use Willughby's short life as a lens through which to view the entire process of seventeenth century scientific endeavor Contributors are Tim Birkhead Isabelle Charmantier David Cram Meghan Doherty Mark Greengrass Daisy Hildyard Dorothy Johnston Sachiko Kusukawa Brian Ogilvie William Poole Chris Preston Anna Marie Roos Richard Serjeantson Paul J Smith and Benjamin Wardhaugh
