

Teaching Philosophy

~Mae Guerra, Experienced Educator

As I reflect upon my teaching career, it is evident that my philosophy in management systems has been greatly influenced by my mentors and colleagues. They have influenced my teaching philosophy because they have developed strong pedagogies with the knowledge to support it, they have set high academic standards for students and for themselves, they have respected intellectual diversity inside and outside the classroom, and they build trust among their students.

My management system philosophy is created from these ideas which are divided into six areas: (1) a positive learning environment, (2) clear expectations, standards and goals, (3) differentiated instruction through modification, (4) ongoing assessment, (5) self-improvement through lifelong learning, and (6) presenting a variety of learning materials to all students.

I believe in creating a positive learning environment in which respect for others is fundamental in promoting intellectual diversity. Respecting and promoting intellectual diversity requires a deeper understanding of how diversity manifests inside and outside of the classroom. Because students bring a diverse set of worldviews to the classroom, I believe that it is the teacher's responsibility to take neutral stances on controversial material, political issues, and general societal issues as well. I play the role of moderator and mentor instead of activist. Taking a neutral stance also acts to challenge students' intellectual abilities. Consequently, it presents students with a positive learning environment where they must use logic and reason to develop positions and counter positions.

I also believe that teachers should set specific and clear expectations, standards and goals from the very first day of the class. Once they are set, they should be adhered to throughout the remainder of the year. I believe setting high standards for students is an important way to get students to rise to their potential. Teachers should also set specific goals for students. Long term goals for students should be set early and should continue over time, allowing students to use what they are learning later in life.

Along with setting standards for students, I create standards for myself as well. One important standard that I have set for myself is giving students a clear indication on how they will be graded. Overall, setting clear standards helps limit grading bias and instances where students may try to take advantage of a teacher's generosity. Teachers should make an extra effort to present class materials in a variety of formats to aid in differentiated

Philosophy Of Teaching Paper:

Teaching Philosophy Statement Umar Aliyu, 2019-08-19 I am delighted to write this book because teachers play a very vital and important role in our life. A good teacher helps us to become good human beings and citizens in our society and the country as a whole. Teachers know that students are the future of any nation so the future development of any nation is in the hands of teachers. There is a core belief behind every educator which is teachers are known to be simply amazing. Teachers inspire people because they impact knowledge and add value to their students' lives and overall these individuals understand the sacrifice and dedication one must make in order to be successful in the lives they touch. The most common role a teacher plays in the classroom is to teach knowledge to children and let us always have it in the back of our minds that it is only in learning you will teach and in teaching you will learn. The most important role of a teacher is to deliver classroom instruction that helps students by ensuring that students experience academic success and through functioning as surrogate parents, mentors and counsellors and even almost politicians since there is almost no limit to the roles a teacher will play. Teachers teach in many ways including lectures, small group activities and hands on learning activities. Therefore to achieve all this there must be some laid down principles that must be followed in order to fully impact the students positively and overall achieve growth and development in the education industry. A typical practice for instructors is to build up a showing logic which causes them to become intelligent specialists all through time on different educating and learning methodologies. A teaching philosophy statement is a narrative that includes your conception of teaching and learning, a description of how you teach and justification for why you teach in a particular way. In other words your teaching philosophy is a self-reflective statement of your beliefs about teaching and learning. It is a one to two page narrative which conveys your core ideas about being an effective teacher in the context of your discipline. The thrust of the paper is to critically analyse what is teaching philosophy and its importance to teachers and the educational sector as a whole. This book will help starting and experienced instructors to improve their teaching abilities by building methods insight and a formative procedure concentrated on the upgrade for learning. According to Aristotle, 'Those who know do while those that understand teach'. I also firmly believe that the most vital and important thing in the world is teaching because the best thing a person can achieve in life is to learn something because it is virtually the only thing which the mind can never overlook, never use up completely, never feel isolated or estranged and will never let you down. This is why Teaching Philosophy is very important to teachers because it enables them to understand the scope and limits of empirical research in education and the relationships between that research and conceptual issues in education thereby making them view and analyse from the perspective of their students. Finally, apart from understanding why students are behaving in a particular way with Teaching Philosophy, teachers would also be able to know how students perceive their actions. As a model in teaching in High school, Colleges or Universities, this book peels back the layers of those conceptual issues in teaching worlds and reveals many surprising findings that will

impact you positively because this book has it all If you have found this book useful please consider leaving a short review on Amazon

A Companion to Wittgenstein on Education Michael A. Peters, Jeff Stickney, 2017-05-03 This book bringing together contributions by forty five authors from fourteen countries represents mostly new material from both emerging and seasoned scholars in the field of philosophy of education Topics range widely both within and across the four parts of the book Wittgenstein s biography and style as an educator and philosopher illustrating the pedagogical dimensions of his early and late philosophy Wittgenstein s thought and methods in relation to other philosophers such as Cavell Dewey Foucault Hegel and the Buddha contrasting investigations of training in relation to initiation into forms of life emotions mathematics and the arts dance poetry film and drama including questions from theory of mind nativism vs initiation into social practices neuroscience primate studies constructivism and relativity and the role of Wittgenstein s philosophy in religious studies and moral philosophy as well as their profound impact on his own life This collection explores Wittgenstein not so much as a philosopher who provides a method for teaching or analyzing educational concepts but rather as one who approaches philosophical questions from a pedagogical point of view Wittgenstein s philosophy is essentially pedagogical he provides pictures drawings analogies similes jokes equations dialogues with himself questions and wrong answers experiments and so on as a means of shifting our thinking or of helping us escape the pictures that hold us captive *Resources in Education*, 2000-10

Handbook of Research on Global Issues in Next-Generation Teacher Education Keengwe, Jared, Mbae, Justus G., Onchwari, Grace, 2016-02-17 There is no question that all aspects of modern life have been imbued with technology In education students are becoming increasingly savvy in their use of the myriad technologies and virtual tools and must be taught adequate complimentary skills to be effective in the 21st century workforce To answer this call teachers education must reflect modern demands by integrating the use of these tools as part of their teaching practices The Handbook of Research on Global Issues in Next Generation Teacher Education addresses this need with precise comprehensive research and case studies With strategies and emerging research on the empowerment of tomorrow s inspirational educational leaders this handbook of research outlines the challenges benefits and opportunities of engaging teachers with the 21st century skills their students require Teachers students of education administrators and policy makers will find this publication offers a number of innovative solutions

Chambers,2013-03-14 This book is about the teaching and study of the humanities in our universities It addresses humanities educators whose job it is to teach undergraduate students researchers into the processes of teaching and learning involved and higher education policy makers The book aims to stimulate discussion among them of the proper purposes processes and outcomes of this form of education And in the process it aims to help define and develop the new field of Arts and Humanities Higher Education AHHE In the humanities as in other academic domains of higher education a public discourse of teaching and of students learning is presently underdeveloped This may seem surprising given the long history of the university as an institution and the huge resources devoted to higher education in many countries but there are of course reasons for it First until very recently there has been no profession of teacher education focused on the academy Simply academics have needed neither training nor qualification as teachers of their subject so that no one has been required to make teacher education their business or teaching learning in 2 higher education their special field of interest As regards schooling the The label Arts and Humanities Higher Education reflects the fact that the humanities subjects Classics Cultural Studies History Art History European Studies Languages Literature Philosophy Religious Studies etc are usually taught in the Faculty of Arts in UK universities The book does not include discussion of the fine or performing arts except incidentally **"The" Browning Society's Papers** ,1881 **Essays in the Philosophy of Education** Celeste Ordas-Botor,1995 **Men Doing Feminism** Tom Digby,2013-10-28 The relation between feminism and men is often presumed to be antagonistic so that men are expected to resist feminism and feminists are assumed to hate men That pattern of opposition is disrupted however by the continually increasing numbers of men who are participating in feminist theory and practice trying to integrate feminist perspectives into their scholarship teaching work play friendships and romantic involvements Responses to this male feminism have varied Sometimes male feminists find some female feminists critical of men who oppose or decline to join feminist projects but also rebuff the few men who do undertake feminist projects On the other hand some women feminists have unequivocally

welcomed men as allies in political business religious and academic contexts The essays in *Men Doing Feminism* reveal that there is justification for both views the skeptical and the enthusiastic because feminist men are as diverse as feminist women Many of the eighteen contributors to this book women men blacks whites gays straights transsexuals use personal narrative to show ways that men s lives can shape their approaches to doing feminism and to convey the opportunities and challenges involved in integrating feminism into a man s life Some authors argue that men s experiences prepare them to make contributions that are of crucial importance to feminist theory Others argue that men must radically reform or even abandon manhood and masculinity if they are to be feminists In *Men Doing Feminism* feminist theory is used to illuminate men s lives and men s lives serve as a basis for feminist theory Contributors Michael Awkward Susan Bordo Harry Brod Tom Digby Judith K Gardiner C Jacob Hale Sandra Harding Patrick Hopkins Joy James David Kahane Michael Kimmel Gary Lemons Larry May Brian Pronger Henry Rubin Richard Schmitt James P Sterba Laurence Mordekhai Thomas and Thomas E Wartenberg

Don't Let School Get in the Way of Education Anane N. Olatunji, 2025-07-01 Imagine the success our children can have if all found school emotionally fulfilling Unfortunately the reality is that far too many youth regardless of their social background don t enjoy school The premises policies and procedures that drive the conventional education model in the US create a system that reduces opportunities for self discovery Many students become alienated from school rather than empowered by it Consequently our youth underperform not only in school but also later on in the workplace Ultimately they fail to fulfill their potential and the contribution they could otherwise give to society In *Don t Let School Get in the Way of Education* author and education expert Dr Anane Olatunji gives us a detailed look at the rift between the conventional education system and the performance of youth exploring the disconnect between current academic approaches and students well being Dr Olatunji then presents a new paradigm for education his FACES framework centered on Fun Affirmation Challenge Expression and Success that empowers students and gives them the self knowledge they need to realize their full potential and aspirations School systems administrators teachers parents and their children will all benefit from this revolutionary approach to education
