Integrated Management of Technical Documentation Jirka Hoppe, 2012-12-06 Writing documentation is an integral part of any technical product development A significant amount of time is spent describing the product functionality giving insights into technical details providing maintenance instructions specifying marketing information writing user manuals etc As the creation of such documentation is generally a source of higher production costs many large companies are realising the need to increase the efficiency of documentation handling Simple documents consisting of only a few pages can be developed on simple systems Basic components of such systems are an editor handling text and graphics file storage and a printer Such configurations however are not sufficient to handle professional documentation as produced by larger companies Detailed studies of technical documentation requirements have revealed that in particular the following functionality is not usually provided by such simple documentation systems Technical documentation is often very large documents having hundreds or even thousands of pages are not exceptional Due to size and complexity technical documentation is developed most often by a team of authors A system for technical documentation has to provide functionality supporting the organisation of a group of authors Technical documentation usually consists of many different documents combined into one large documentation for a particular product The optimum organisation of the storage and retrieval of documents is crucial for the performance and acceptability of the system The functionality offered by normal file systems is not adequate to organise complex systems **Organization and Organizing** Daniel Robichaud, Francois

Cooren,2013-05-02 Recipient of the 2013 Top Edited Book Award by the Organizational Communication Division of the National Communication Association USA This timely collection addresses central issues in organizational communication theory on the nature of organizing and organization The unique strength of this volume is its contribution to the conception of materiality agency and discourse in current theorizing and research on the constitution of organizations It addresses such questions as To what extent should the materiality of texts and artifacts be accounted for in a process view of organization What part does materiality play in the process by which organizations achieve continuity in time and space In what sense do artifacts perform a role in human communication and interaction and in the constitution of organization What are the voices and entities participating in the emergence and stabilization of organizational reality The work represents scholarship going on in various parts of the world and features contributions that overcome traditional conceptions of the nature of organizing by addressing in specific ways the difficult issues of the performative character of agency materiality as the basis of the iterability of communication and continuity of organizations and discourse as both textuality and interaction The contributions laid out in this book also pay tribute to the work of the organizational communication theorist James R Taylor who developed a view of organization as deeply rooted in communication and language Contributors extend and challenge Taylor s communicative view by tackling issues and assumptions left implicit in his work
