Photography Theory in Historical Perspective Hilde Van Gelder,Helen Westgeest,2011-04-25 Photography Theory in Historical Perspective Case Studies from Contemporary Art aims to contribute to the understanding of the multifaceted and complex character of the photographic medium by dealing with various case studies selected from photographic practices in contemporary art discussed in the context of views and theories of photography from its inception uses case studies to explain photographic practices in contemporary art and place them in the context of theory presents current debates on theory of photography through comparisons to research of other visual media applicable to vernacular and documentary photography as well as art photography The Photographic Times ,1884 Photography and Making Bedouin Histories in the Naqab, 1906-2013 Emilie Le Febvre,2023-12-22 Introducing a novel anthropological study of photography in the Middle East Emilie Le Febvre takes us to the Naqab Desert where Bedouin use photographs to make and respond to their own

histories She argues Bedouin presentations of the past are selective but increasingly reliant on archival documents such as photographs which spokespersons treat as evidence of their local histories amid escalating tensions in Israel These practices shape Bedouin visual historicity that is the diverse ways people produce their pasts in the present with images This book charts these processes through the afterlives of six photographs c 1906 2013 as they circulate between the Naqab s entangled visual economies a transregional landscape organised by cultural ideals of proximity and assemblages of Bedouin iconography Le Febvre illustrates how representational contentions associated with tribal civic and Palestinian Israeli politics influence how images do history work in this society She concludes Bedouin visual historicity is defined by acts of persuasion during which photographs authenticate alternating history projects Here Bedouin value photographs not because they evidence singular narratives of the past Rather the knowledges inscribed by photography are multifarious as they support diverse constructions of history and society with which members mediate a wide range of relationships in southern Israel This book bridges studies of anthropology photography Palestinian Israeli politics and Bedouin Middle East history *Photo Archives and the Place of Photography* Geraldine A. Johnson, Deborah Schultz, 2025-02-07 This collection of chapters investigates the effects of mobility and place on a range of photographic archives and explores their potential for cross disciplinary dialogue The book explores photographic images used in the study of art as well as the implications of placing European images of non European cultures in an archive album library or museum It also addresses questions of digital space which renders images more visually accessible but further complicates issues relating to location The contributors consider these issues through case studies based on a variety of archives institutions and disciplines Just as photographs are conceived as unstable objects so conventional borders between disciplines and locations are challenged and opened up with chapters drawing on a range of disciplinary theories and practices The focus of the individual chapters is global as seen in contributions not only on Euro American topics but also on Orientalizing approaches to photographing the Ancient Near East photographic archives of Bedouin subjects and digital photographic archives in an Iranian context This book will be of interest to scholars of art history visual and cultural studies anthropology and archaeology as well as those working on the history and theory of photography and histories and theories of the archive **Anthony's Photographic Bulletin** ,1886

Penrose's Annual ,1906 "Process Work" Year Book ,1908 Photographic Progress ,1909 **Foundations of Photography** George Pavlidis, 2022-10-03 This book offers an in depth technical presentation of photography and details about the inner workings of the digital camera while keeping the artistic principles in mind Departing from the current stream the book treats photography as a highly scientific and technical subject and serves as a reference to those who seek for an understanding of the technical aspects relating to the photographic camera the beating heart of photography It offers insight on why the photographs are created the way they are highlighting also the limitations As the author of this book is an image technology scientist and a photography enthusiast who has been teaching photography for a long time this treatise
