Each of the three volumes concentrates on distinct areas of research, exposing the reader to the diverse theoretical and empirical approaches and topics in the field. Volume 1 focuses on the cross-cultural study of personality dispositions or traits. Volume 2 examines the relationship between culture and other important aspects of personality, including the self, emotions, motives, values, beliefs, and life narratives, as well as aspects of personality and adjustment associated with biculturalism and intercultural competence. Volume 3 looks at evolutionary, genetic, and neuroscience perspectives on personality across cultures, along with ecological and cultural influences. In addition to providing readers with a thorough analysis of current and future directions for research, this unrivaled work brings together multiple perspectives on personality across cultures, thereby promoting a more integrative understanding of this important topic.
