Having taught at the fifth grade level for many years I always felt an awareness of the need for literature which would stimulate the young reader into thinking about the importance of placing faith in a Higher Being as well as raising thought to one s responsibility to live a life of morality and serving others Prairie dogs seemed to be the perfect animals to form my story around since they are in actuality high on the list of helpless creatures facing extinction Therefore my purpose is twofold bringing to surface their present day plight as well as fulfilling my other intentions It is my sincere hope that young and old alike will find a blessing in the reading of this story that it may fill hearts with hope and souls with contentment both of which I have personally found in serving the One they call The Great Creator *Backtracking* Benjamin Long,2004-06-28

With a spirit of exploration rarely seen in modern times Ben Long and his wife Karen Nichols quit their jobs sold their house and set out to follow in the footsteps of Meriwether Lewis and William Clark Their quest To look at the plants and animals encountered during the Corps of Discovery s great endeavor and report on how nature is doing after two centuries of civilization Long s voice is appealing and readers will have no trouble imagining themselves traveling along with the couple

in their fully loaded Subaru Long and Nichols drove from Montana to the Pacific checking on Lewis and Clark's natural discoveries along the way prairie dogs cutthroat trout sharptail grouse coyotes beavers bison grizzlies whitebark pine even a dinosaur fossil Everywhere they encounter another persistent force of nature human nature This highly readable travelogue is informed by humor history the sacred journals of Lewis and Clark and the vivid experience of discovery The Design of Childhood Alexandra Lange, 2018-06-12 From building blocks to city blocks an eye opening exploration of how children's playthings and physical surroundings affect their development Parents obsess over their children's playdates kindergarten curriculum and every bump and bruise but the toys classrooms playgrounds and neighborhoods little ones engage with are just as important These objects and spaces encode decades even centuries of changing ideas about what makes for good child rearing and what does not Do you choose wooden toys or plastic or increasingly digital What do youngsters lose when seesaws are deemed too dangerous and slides are designed primarily for safety How can the built environment help children cultivate self reliance In these debates parents educators and kids themselves are often caught in the middle Now prominent design critic Alexandra Lange reveals the surprising histories behind the human made elements of our children's pint size landscape Her fascinating investigation shows how the seemingly innocuous universe of stuff affects kids behavior values and health often in subtle ways And she reveals how years of decisions by toymakers architects and urban planners have helped and hindered American youngsters' journeys toward independence Seen through Lange's eyes everything from the sandbox to the street becomes vibrant with buried meaning The Design of Childhood will change the way you view your children's world and your own
