Pre Entry Law 2015:

Emerging Powers, Global Justice and International Economic Law Andreas Buser, 2021-01-04 The book assesses emerging powers influence on international economic law and analyses whether their rhetoric of reforming this unjust order translates into concrete reforms The questions at the heart of the book surround the extent to which Brazil Russia India China and South Africa individually and as a bloc BRICS provide alternative regulatory ideas to those of Western States and whether they are able to convert their increased power into influence on global regulation To do so the book investigates two broader case studies namely the reform of international investment agreements and WTO reform negotiations since the start of the Doha Development Round As a general outcome it finds that emerging powers do not radically challenge established law Third World rhetoric mostly does not translate into practice and rather serves to veil economic interests Still emerging powers provide for some alternative regulatory ideas already leading to a diversification of international economic law As a general rule they tend to support norms that allow host States much policy space which could be used to protect and fulfil socio economic human rights especially but not only in the Global South

China's State-Directed Economy and the International Order Luyao Che, 2019-03-14 This book explores the legal implications of China's state directed economic model for the existing international economic order It first reveals the close links between the market and the state in contemporary China by profiling an emerging triple role of the state in the economy It then explores how the domestic legal system underpins the distinctive market state relationship before analysing whether essential norms of international economic law which bracket the international economic order are able to adapt to China's innovative market state relationship The book argues that the international economic order is inherently limited since it tends to adhere to an orthodox dichotomy with a clear boundary between the market and the state It also suggests that China's new state market relationship has challenged the dichotomy the state does not intend to eliminate the functioning of the market but conversely utilises a market mechanism and makes itself more integrated into the market Lastly the book proposes a fresh perspective to comprehend the market state question which does not to take for

granted that all market state relationships are mutually exclusive **Diversity in Practice** Spencer Headworth, Robert L. Nelson, Ronit Dinovitzer, David B. Wilkins, 2016-04-01 Expressions of support for diversity are nearly ubiquitous among contemporary law firms and corporations Organizations back these rhetorical commitments with dedicated diversity staff and various diversity and inclusion initiatives Yet the goal of proportionate representation for people of color and women remains unrealized Members of historically underrepresented groups remain seriously disadvantaged in professional training and work environments that white upper class men continue to dominate While many professional labor markets manifest patterns of demographic inequality these patterns are particularly pronounced in the law and elite segments of many professions Diversity in Practice analyzes the disconnect between expressed commitments to diversity and practical achievements revealing the often obscure systemic causes that drive persistent professional inequalities These original contributions build on existing literature and forge new paths in explaining enduring patterns of stratification in professional careers These more realistic assessments provide opportunities to move beyond mere rhetoric to something approaching diversity in practice
