Gaining the knowledge and skills needed to do research typically has to be done alongside carrying out the project itself. Students often have to conduct their research independently perhaps with limited tutor contact. What is needed in such situations is a resource that supports the new researcher on every step of the research journey from defining the project to communicating its findings. *Management Research Applying the Principles* provides just such a resource. Structured around the key stages of a research project it is designed to provide answers to the questions faced by new researchers but without neglecting the underlying principles of good research. Each chapter includes next steps activities to help readers apply the content to their own live research project. The companion website provides extensive resources including video tutorials to support the development of practical research skills. The text reflects the richness and variety of current business and management research both in its presentation of methods and techniques and its choice of examples drawn from different subject disciplines, industries and organizations. *Management Research Applying the Principles* combines diversity of coverage with a singularity of purpose to help students complete their research project to a rigorous standard.

Qualitative Management Research in Context Bruno

Américo, Stewart Clegg, César Tureta, 2022-08-18. This concise book uses narrative fiction to address how researchers can conduct qualitative research using both online and first hand data and digital and face to face methods. The book is structured around four phases of the research process: accessing management field research, writing the literature review, collecting and analysing data and enacting qualitative research, and finally the creative process of writing qualitative research. Theory and practice are merged through a situation based case study within each chapter with the methods and tools employed in each context explored through narrative fiction. The protagonists of each case have specific questions, emotions and ambiguities that qualitative researchers need to face, offering a unique approach to the practice of qualitative research and how it is used in real life situations. Founded on the idea of enacting and not just doing qualitative research, this book offers toolkits that the researcher can use to operationalize research from start to finish. It will be of interest to postgraduate students conducting research based projects in Business and Management, PhD researchers and academics.
