Hidden Hands focuses on a specific and neglected area of contemporary child welfare that of children's paid work and labour. This book provides the first cross cultural examination of children's productive activities, their relationship to children's broader social lives and their implications for the child's education, welfare and well being. The contributors look at the situation both here and overseas. They discuss issues including conflicts between schooling, education and work in the UK, child poverty, motivating children to work, children from ethnic minorities, the work and labour of children in industrialised countries and the situation in the US, Denmark, Germany and Russia. The growth in the study of childhood encompasses anthropology, sociology, social policy and social work as well as education. This book will be of use in all of these areas.

Individual and Society Lizabeth A. Crawford, Katherine B. Novak, 2024-05-14. Unlike other texts for undergraduate sociological, social psychology courses, *Individual and Society* covers each of the three research traditions in sociological, social psychology, symbolic interactionism, social structure and personality and group processes and structures. With this approach, the authors make clear the link between sociological, social psychology theory and methodology. Students will gain a better understanding of how and why social psychologists trained in sociology ask particular kinds of questions, the types of research they are involved in and how their findings have been or can be applied to contemporary societal patterns and problems. This new third edition makes the emphasis on social inequality within sociological, social psychology a key theme in earlier versions of the book more salient throughout the text by including new or expanded discussions of intersectionality, positionality, the experiences of gender and sexual minorities, racial microaggression, contemporary social movements and the complexities of allyship. Other additions to the text address the ubiquity of the Internet and social media where the authors consider how these phenomena have shaped the experiences of Generation Z, the first digital natives and altered individuals' self concepts and social relationships. Engaging exercises and group activities are also embedded within each chapter to enhance students' readiness to reflect and think critically about the social world around them and to improve their understanding of the different dimensions of sociological, social psychology and how they relate to everyday life.

Children and Young People's Digital Lifeworlds Chikezie E. Uzuegbunam, 2024-03-26. This book explores the ways in which adolescents in Nigeria domesticate technology and the role of digital gatekeepers such as parents, guardians and teachers in their digital lifeworlds. Using a child centred framework, what emerges is a rounded and textured analysis of how technology fits into pivotal aspects of the lives of teenagers. Here, teens are understood as actors rather than just users of media and technology. The digital lifeworlds of young people in advanced economies of the Majority World are well researched. In contrast, research focusing on pre-teens and teenagers' digital practices and participation in Majority World such as Africa is still fundamentally narrow. The book is relevant to fields like sociology, media studies, youth studies, mobile media studies, African studies and global media studies.
