

**FAMILY PLANNING AND THE THAI FERTILITY DECLINE:
APPLYING A CULTURAL FRAMEWORK FOR ANALYSIS**

*Doc M. Billingsley
Millsaps College
Jackson, Mississippi*

Abstract. This paper represents the marriage of two research projects that I conducted as an undergraduate at Millsaps College. As a junior, I was assigned a research paper in which I had to examine a contemporary social phenomenon using the major theories of three classical sociologists. I chose to examine the recent and remarkable demographic history of Thailand, a nation regarded by many as providing a highly successful example of voluntary family planning. The results of this academic exercise suggested that there are meaningful patterns in fertility behaviors that correspond to religious and linguistic affiliations. I later decided to pursue a deeper understanding of the Thai demographic transition by studying in Thailand and touring the sites of family planning activity myself. After completing intensive language training, I enrolled as a student at Chiang Mai University in Northern Thailand for the fall semester of my senior year. As I met with public health officials and nongovernmental volunteers who operate Thailand's multifaceted family planning program, and as I became more fluent in Thai culture and Theravada Buddhism, my perspective on family planning has gradually shifted focus. My goal in this paper is to increase awareness of the diverse and interrelated factors involved in individual couples' reproductive decision-making. In the context of Thailand, a unique combination of cultural traits, personal motivations, and institutional supports have precipitated a dramatic demographic transformation over a relatively short period of time.

Twenty first century processes such as globalization and digitization pose various challenges for primary, secondary and post secondary teacher education at both the formal and informal education levels. These challenges are addressed by innovators in the field of teacher education, i.e. teacher educators, pre service teachers, in service teachers, scholars and policy makers. This edited volume explores future trends in three different spheres of teacher education: 1. pedagogies: emotive, reflective, cognitive and didactic practices; 2. technologies: digital competencies, artificial intelligence in teaching and the transformative potential of digital tools in intercultural learning; and 3. societies: multilingualism, attitudes towards literacies, societal polarization and teacher shortages. The suggested innovations aim to bridge the gap between theory and practice by drawing upon the critical evaluation of theoretical approaches as well as the discussion of best practice examples. The chapters are situated in various countries such as Vietnam, Canada, Argentina, Spain, Germany, the USA, Switzerland, Sweden, Italy and as a transnational

cooperation Palestine and the UK The Future of Teacher Education Innovations across Pedagogies Technologies and Societies considers various models of teacher education e g reflective model competency based model etc and applies a multitude of different research methods e g didactic analysis of teaching material thematic analysis of reflections etc
