Improving Patrol Productivity: Specialized patrol William G. Gay,Stephen Schack,Theodore H. Schell,1977 **A Clinical Guide for the Treatment of Schizophrenia** Alan S. Bellack,2013-06-29 Research on the nature and treatment of schizophrenia has undergone a revival and metamorphosis in the last decade For a long while the field had been moribund weighed down by an unreliable diagnostic system pessimism about the possibility of new discoveries and a dearth of research funds A number of factors have seemingly coalesced to change this situation with the result that the field is now alive with excitement and optimism Four factors seem to have played important roles in the resurgence of interest First prior to the publication of DSM III in 1980 there was no reliable diagnostic system for the disorder Previous definitions were overly general and imprecise Consequently the label schizophrenia applied to a very heterogeneous group of severely disturbed patients It was rarely clear whether two investigators had studied comparable samples making it impossible to determine if flawed findings were generalizable or if failures to replicate were due to the unreliability of the results or the fact that the investigators had studied different disorders DSM III has not totally resolved this problem but it has allowed scientists to reliably identify a much more homogeneous group As a result it is now possible to integrate the results of different studies making it much more likely that we can make important advances The second important factor was the development of new

technologies that promised to help uncover the nature and etiology of the disorder

Improving Patrol Productivity

William G. Gay, Stephen Schack, 1977 Also covered are the following the use of crime analysis in support of routine patrol operations and the conducting of preplanned and directed prevention deterrence and apprehension activities The volume concludes with the presentation of selected case studies of departments which have implemented many of the approaches outlined and with a discussion of the major issues faced in planning implementing and evaluating changes in the patrol function The second part of a two volume prescriptive package is directed toward assisting police departments in improving the productivity of their patrol operations the most costly aspect of policing Recommendations in this second report are based on a state of the art review of patrol operations in many police departments throughout the country and an assessment of recent research and commentary on patrol Presented is a discussion of the appropriate use and effective operation of specialized patrol
