contemporary study of Hellenistic moral philosophy and early Christianity      **The Anthem Companion to Karl Jaspers**  
Hans Joas, Matthias Bormuth, 2025-04-15 This collection of articles by an international group of leading experts has its special focus on the relevance of Karl Jaspers's philosophy for the social sciences. It also includes classical evaluations of Jaspers's thinking by renowned authors Talcott Parsons and Jürgen Habermas. Several chapters are devoted to the relationship between Jaspers and his teacher Max Weber, his famous student Hannah Arendt, and crucial figures in his intellectual world: Wilhelm Dilthey, Georg Simmel. Others deal with his relevance for disciplines from psychiatry to the study of religion and the historico-sociological research about the Axial Age, a term coined by Jaspers. In his introduction, editor Hans Joas tries to systematise Jaspers's relevance for the contemporary social sciences and to explain why Parsons had called him a social scientist's philosopher. The book promises to become an indispensable source in the re-evaluation of Jaspers's thinking in the years to come.      The Structure of Scientific Theories Frederick Suppe, 1977 A clear and comprehensive introduction to contemporary philosophy of science. American Scientist. The best account of scientific theory now available, one that surely commends itself to every philosopher of science with the slightest interest in metaphysics. Review of Mathematics. It should certainly be of interest to those teaching graduate courses in philosophy of science and to scientists wishing to gain a further appreciation of the approach used by philosophers of science. Science Activities      **Interpreting across Boundaries** Gerald James Larson, Eliot Deutsch, 2014-07-14 This volume is a state-of-the-art assessment of comparative philosophy written by some of the leading practitioners of the field. While its primary focus is on gaining methodological clarity regarding the comparative enterprise of interpreting across boundaries, the book also contains new substantive essays on Indian, Chinese, Japanese, and European thought. The contributors are Roger T. Ames, William Theodore de Bary, Wing-tsit Chan, A. S. Cua, Eliot Deutsch, Charles Hartshorne, Daya Krishna, Gerald James Larson, Sengaku Mayeda, Hajime Nakamura, Raimundo Panikkar, Karl H. Potter, Henry Rosemont Jr., Ben-Ami Scharfstein, Ninian Smart, Fritz Staal, and Frederick J. Streng. Comparative or cross-cultural philosophy can be seen as a relative newcomer to the field of philosophy. It has its antecedents in the emergence of comparative studies in nineteenth-century European intellectual history as well as in the sequence of East-West Philosophers' Conferences at the University of Hawaii which began in 1939. This book will prove to be of great significance in helping to define a field that is only now becoming fully self-conscious methodologically and substantively about its role and function in the larger enterprises of philosophy and comparative studies. Originally published in 1988, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press.
