Martin Buber's Dialogical Thought as a Philosophy of Action Asaf Ziderman, 2024-10-30 This book promotes a

philosophical revival of Buber's dialogical thought by repositioning it as a philosophy of action departing from a long established consensus that narrowly viewed it as a post Kantian epistemology Based on careful analysis of his writings the book's main thrust is to reconstruct Buber's argument that dialogue is the perfected form of action and a perfect action is necessarily dialogical This reconstruction renders Buber's dialogical thought pertinent to contemporary analytic philosophy by situating it within central discussions in the field of philosophy of action An Introduction to the Philosophy of

Psychology Daniel Weiskopf, Fred Adams, 2015-01-15 Psychology aims to give us a scientific account of how the mind works But what does it mean to have a science of the mental and what sort of picture of the mind emerges from our best psychological theories This book addresses these philosophical puzzles in a way that is accessible to readers with little or no background in psychology or neuroscience Using clear and detailed case studies and drawing on up to date empirical research it examines perception and action the link between attention and consciousness the modularity of mind how we understand other minds and the influence of language on thought as well as the relationship between mind brain body and world The result is an integrated and comprehensive overview of much of the architecture of the mind which will be valuable for both students and specialists in philosophy psychology and cognitive science **Biologic Regulation of Physical**

Activity Thomas W. Rowland, 2016-10-17 The benefits of a healthy lifestyle are well documented yet many people continue to struggle with sedentary behavior and obesity In *Biologic Regulation of Physical Activity* Dr Thomas W Rowland posits a distinct possibility of the existence of a central biologic controller of activity If harnessed this mechanism could lead to breakthroughs in health science professionals quest for more effective ways of helping people be more active and as a result healthier Rowland is one of the most well respected pediatric cardiologists in the United States He has authored three other books and more than 150 journal articles and has served in several key national leadership positions in pediatric medicine In *Biologic Regulation of Physical Activity* Rowland uses his expertise along with numerous references and direct quotes from expert witnesses to provide a detailed account of how current research may support the existence of a biologic regulator a mechanism in the brain that involuntarily controls biological processes associated with physical activity Rowland proposes a possible mechanism for such a control and explores the implications of this theory This developing area of research and theory offers a new lens through which health professionals and those who research issues related to obesity physical activity adherence and sedentary behaviors can view their work The book moves methodically through the research rationale and implications of a biologic regulator of physical activity In part I *Surveying the Evidence* readers are guided through a litany of research both on humans and on animals that provides support for the existence of a biologic regulator This section synthesizes evidence from an interdisciplinary perspective covering research on topics such as behavioral disorders brain damage lifetime activity patterns and sex differences Part II *Rationale and Mechanisms* details the possible biologic explanation for control of energy output through activity and proposes a mechanism by which it might function in order to

maintain an energy in energy out balance The hypothesis presented in this section is that the body has a need for energy balance that leads to activity regulation similar to how the body regulates appetite In part III Implications of Biologic Regulation of Activity some clear implications from current research which may help health science professionals in their treatment and prevention efforts against patients obesity and inactivity are discussed Rowland also poses some critical questions for further research if indeed a biologic controller of activity exists such as how much effect a biologic controller might have on activity level as compared to environmental factors and whether this biologic regulator could be altered This book will initiate further discussion examination and research into the idea that physical activity may be at least in part controlled by a central biologic regulator Further study may lead to a widespread realization that there is an involuntary biologic regulator of activity that once fully understood could lead researchers to discover alternative interventions in the fight against inactivity and obesity

The Intellectual in Twentieth-Century Southern

Literature Tara Powell, 2012-01-09 Never in its long history has the South provided an entirely comfortable home for the intellectual In this thought provoking contribution to the field of southern studies Tara Powell considers the evolving ways that major post World War II southern writers have portrayed intellectuals from Flannery O'Connor's ironic view of interlockchuls to Gail Godwin's southerners striving to feel at home in the academic world Although Walker Percy like his fellow Catholic writer O'Connor explicitly rejected the intellectual label for himself he nonetheless introduced the modern novel of ideas to southern letters Powell shows by placing sympathetic non-caricatured intellectuals at the center of his influential works North Carolinians Doris Betts and her student Tim McLaurin made their living teaching literature and creative writing in academia and Betts's fiction often includes dislocated academics while McLaurin's superb memoirs often funny frequently point up the limitations of the mind as opposed to the heart and the spirit Examining works by Ernest Gaines Alice Walker and Randall Kenan Powell traces the evolution of the black American literacy narrative from a stress on the post Emancipation conviction which saw formal education as an essential means of resisting oppression to the growing suspicion in the post civil rights era of literacy acts that may estrange educated blacks from the larger black community

Powell concludes with Godwin who embraces university life in her fiction as she explores what it means to be a southern female intellectual in the modern world a world in which all those markers inscribe isolation **The Man Who Counted** Infinity and Other Short Stories from Science, History and Philosophy Saso Dolenc, 2024 If I were the only survivor on a remote island and all I had with me were this book a Swiss army knife and a bottle I would throw the bottle into the sea with the note Don't worry I have everything I need Ciril Horjak alias Dr Horowitz a comic artist The writing is understandable but never simplistic Instructive but never patronizing Straightforward but never trivial In depth but never too intense Ali erdin editor at Delo the main Slovenian newspaper Does science think Heidegger once answered this question with a decisive No The writings on modern science skillfully penned by Saso Dolenc these small stories about big stories quickly convince us that the contrary is true Not only does science think in hundreds of unexpected ways its intellectual challenges and insights are an inexhaustible source of inspiration and entertainment The clarity of thought and the lucidity of its style make this book accessible to anyone in the finest tradition of popularizing science its achievements dilemmas and predicaments Mladen Dolar philosopher and author of A Voice and Nothing More Saso Dolenc is undoubtedly one of our most successful authors in the field of popular science possessing the ability to explain complex scientific achievements to a broader audience in a clear and captivating way while remaining precise and scientific His collection of articles is of particular importance because it encompasses all areas of modern science in an unassuming almost light hearted manner Bo tjan ek physicist and former president of the Slovenian Academy of Sciences and Arts **Roads to the Palace** Michael Rosenak, 1995-08-01 Is Jewish education simply an ancient and archaic type of socialization into customs and ceremonies or a sophisticated practice based on rich cultural conceptions of the educated individual the decent society and the relationship of knowledge and virtue This author rather than offering a dry analysis takes the reader on a leisurely yet careful excursion into the world of Jewish tradition in order to discover models of the educated human being within it In the process the reader discovers dialogues between Western philosophy and Talmudic Midrash and is offered a fresh view of culture faith and identity **The Location of Experience** Adela Pinch, 2024-10-15 We tend to feel that works of fiction give us special access to lived experience But how do novels cultivate that feeling Where exactly does experience reside The Location of Experience argues that paradoxically novels create experience for us not by bringing reality up close but by engineering environments in which we feel constrained from acting By excavating the history of the rise of experience as an important category of Victorian intellectual life this book reveals how experience was surprisingly tied to emotions of remorse and regret for some of the era's great women novelists the Brontës George Eliot Margaret Oliphant and Elizabeth Gaskell It shows how these writers passed ideas about experience and experiences themselves among each other Drawing on intellectual history psychology and moral philosophy The Location of Experience shows that through manipulating the psychological dimensions of fiction's formal features Victorian women novelists produced a philosophical account of experience that rivaled and complemented that of
