Katerberg,2004 Over the last three decades a major cultural shift has taken place in the attitudes of Western societies toward the future Modernity's eclipse by postmodernity is characterized in large part by the loss of hope for a future substantially better than the present Old optimism about human progress has given way to uncertainty and fear In this book scholars from various disciplines theology the social sciences and the humanities explore the move from a bculture of

optimism to a culture of ambiguity and they seek to infuse today's jaded language of hope with a new vitality. *The Future of Hope* offers a powerful critique of today's stifling cultural climate and shows why the vision of hope central to Christian faith must be a basic component of any flourishing society. The first section of the book sets the context with telling cultural criticism of modernity. The second section focuses on affinities between premodern Christian visions of hope and twentieth-century thought. The final section of the book examines the relationship between postmodern thought, Christian tradition, and biblical hope, addressing how Christians in a postmodern world can best articulate their faith. Written by truly profound thinkers, these chapters are diverse in their content, methodologies, and temperament, yet they are united by a deep engagement with both the Christian tradition and the larger cultural and intellectual climate in which we live and work. *The Future of Hope* can thus be read not just as an attempt at retrieval of hope for today but as itself one small act of hope in an age when people too seldom take time to think critically and hopefully. Contributors: David Billings, Robert Paul Doede, Kevin L. Hughes, Paul Edward Hughes, Daniel Johnson, William Katerberg, John Milbank, Jurgen Moltmann, James K. A. Smith, Miroslav Volf, Nicholas Wolterstorff.

*Analog Fictions for the Digital Age* Julia Breitbach, 2012. Shows how current photographic discourse can illuminate the analysis of recent literary realism and proposes a truly original photographic hermeneutics for literary study. Both realist and postmodernist aesthetics in the twenty-first century and the legacy of analog photography in its recent digital incarnation depend on an aesthetics of trust and a sense of contingent referentiality. Julia Breitbach's innovative study demonstrates how current photographic discourse may be used as an illuminating critical idiom for the analysis of recent forms of literary realism, thus proposing a photographic hermeneutics for the study of literature. Along with a thorough critical investigation of both fields, Breitbach offers a pioneering theoretical exploration of analog and digital photography based on recent thing theory, which she then applies to in-depth analyses of realist aesthetics in selected postmillennial novels by Don DeLillo, Michael Ondaatje, and Ali Smith, yielding fresh perspectives on the remediation between photography and literature in the twenty-first century. An original contribution to the study of contemporary Anglophone literatures with an interdisciplinary appeal, this study will be of interest especially to scholars and students in Anglophone literary studies, comparative literature, cultural studies, and media studies. Julia Breitbach is Assistant Professor in the Department of American Studies at the University of Konstanz, Germany.

*Gandhi in the West* Sean Scalmer, 2011-01-06. The non-violent protests of civil rights activists and anti-nuclear campaigners during the 1960s helped to redefine Western politics. But where did they come from? Sean Scalmer uncovers their history in an earlier generation's intense struggles to understand and emulate the activities of Mahatma Gandhi. He shows how Gandhi's non-violent protests were the subject of widespread discussion and debate in the USA and UK for several decades. Though at first misrepresented by Western newspapers, they were patiently described and clarified by a devoted group of cosmopolitan advocates. Small groups of Westerners experimented with Gandhian techniques in virtual anonymity, and then on the cusp of the 1960s brought these

methods to a wider audience The swelling protests of later years increasingly abandoned the spirit of non violence and the central significance of Gandhi and his supporters has therefore been forgotten This book recovers this tradition charts its transformation and ponders its abiding significance Posthumous Images Chad Elias,2018-09-07 For almost two decades of its history 1975 90 Lebanon was besieged by sectarian fighting foreign invasions and complicated proxy wars In Posthumous Images Chad Elias analyzes a generation of contemporary artists who have sought in different ways to interrogate the contested memory of those years of civil strife and political upheaval In their films photography architectural projects and multimedia performances these artists appropriate existing images to challenge divisive and violent political discourses They also create new images that make visible individuals and communities that have been effectively silenced rendered invisible or denied political representation As Elias demonstrates these practices serve to productively unsettle the distinctions between past and present the dead and the living official history and popular memory In Lebanon the field of contemporary art is shown to be critical to remembering the past and reimagining the future in a nation haunted by a violent and unresolved war
