## Photosynthesis

Photosynthesis is a process by which green plants and certain bacteria use the energy from the sun to convert carbon dioxide and water into the simple sugar glucose ( $C_6H_{12}O_6$ ) and oxygen. Plants and animals use glucose as a source of energy for all life processes.

The process of photosynthesis begins in the leaves, where light energy is absorbed by the green pigment chlorophyll. Chlorophyll is found within a plant cell organelle called the chloroplast. The captured light energy is then used to convert carbon dioxide and water into glucose and oxygen.

## Cellular Respiration

Cellular Respiration is a process by which cells break down glucose to release stored energy.

Stage 1 of respiration begins in the cell's cytoplasm through the break-down of glucose into smaller molecules releasing a small amount of energy.

During Stage 2, the smaller molecules combine with oxygen in the mitochondria to produce a large amount of energy along with carbon dioxide and water.

The formative assessment probe in this first book devoted exclusively to life science in her *Uncovering Student Ideas in Science* series. In this volume Keeley addresses the topics of life and its diversity structure and function life processes and needs of living things ecosystems and change reproduction life cycles and heredity and human biology. Using the probes as diagnostic tools that identify and analyze students' preconceptions teachers can easily move students from where they are in their current thinking to where they need to be to achieve scientific understanding. At the same time use of the probes deepens the teacher's understanding of the subject matter suggests instructional implications and expands assessment literacy. Using the student learning data gained through the probes to inform teaching and learning is what makes the probes formative. Each probe is supported by extensive Teacher Notes which provide background information on the purpose of the probes related concepts explanations of the life science ideas being taught related ideas in the national science standards research on typical student misconceptions in life science and suggestions for instruction and assessment. *AQA A2 Biology Student Unit Guide New Edition: Unit 4 Populations and Environment* Steve Potter, Martin Rowland, 2012-05-18 Written by Steve Potter and revised by a senior examiner Martin Rowland this AQA A2 Biology Student Unit Guide is the essential study companion for Unit 4 Populations and Environment.
