

## Chapter 8 Reading Guide – ANSWER KEY

1. As a review, define the terms **autotroph** and **heterotroph**. Keep in mind that plants have mitochondria and chloroplasts and do both cellular respiration and photosynthesis! Autotrophs are able to sustain themselves without eating other living organisms or material derived from living organisms. Autotrophs make their own “food” through either photosynthesis (solar energy → glucose) or chemosynthesis (inorganic materials such as methane and hydrogen sulfide → organic molecules). Autotrophs are also known as producers. Heterotrophs must consume other organisms for energy. Decomposers (some bacteria and fungi) are considered heterotrophs.
2. Draw a picture of a chloroplast and label the **stroma**, **thylakoid**, **thylakoid space**, **inner membrane**, and **outer membrane**.

3. Use both chemical symbols and words to write out the formula for photosynthesis.  $6\text{CO}_2 + 6\text{H}_2\text{O} + \text{Light Energy} \rightarrow \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{O}_2$ . Carbon dioxide reacts with water and energy from the sun to produce glucose and oxygen. Photosynthesis is another example of a redox reaction where carbon dioxide is reduced to glucose and water is oxidized to oxygen. The electrons increase in potential energy as they move from water to sugar (endergonic). The energy is provided by the sun.
4. Photosynthesis is not a single process, but two processes, each with multiple steps.
  - a. Explain what occurs in the **light reactions** stage of photosynthesis. Be sure to use **NADP<sup>+</sup>** and **photophosphorylation** in your discussion. The light reactions occur in the thylakoid membranes of the chloroplasts. During the light reactions, water is split which provides a source of electrons and H<sup>+</sup> ions (protons). When water is split, oxygen gas is released as a byproduct. Light absorption by chlorophyll transfer electrons and H<sup>+</sup> to an electron carrier called NADP<sup>+</sup>. The light reactions also generate ATP, using chemiosmosis to power the addition of a phosphate to ADP. This is called photophosphorylation. At the end of the light reactions, light energy is converted into chemical energy store in ATP and NADPH. (No sugar yet!)
  - b. Explain the **Calvin cycle**, utilizing the term **carbon fixation** in your discussion. The Calvin cycle occurs in the stroma of the chloroplasts. The Calvin cycle begins with the incorporation of carbon dioxide from the air into organic molecules already present in the chloroplast. This is known as carbon fixation. The Calvin cycle then reduces the fixed carbon into carbohydrates by adding electrons provided NADPH. Chemical energy is supplied by ATP. The end result of the Calvin cycle is carbohydrate molecules called G3P which consist of 3 carbons each. G3P molecules are used to produce glucose.

discussions and technology to engage students and enhance understanding

**How do you create a positive learning environment in your classroom?** Answer I prioritize creating a supportive and inclusive classroom where students feel safe to express themselves and take risks in their learning. I establish clear expectations, promote mutual respect, and celebrate individual achievements to foster a sense of belonging and motivation.

**Describe a challenging classroom situation you have faced and how you handled it.** Answer In one instance, I had a student struggling with a particular concept despite various teaching approaches. I scheduled one-on-one time to understand their learning style better and tailored my instruction accordingly. By providing additional resources and offering encouragement, I helped the student gain confidence and eventually grasp the concept.

**How do you assess student learning and progress?** Answer I use a variety of formative and summative assessment methods such as quizzes, projects, presentations, and observations. These assessments allow me to gauge understanding, identify areas needing reinforcement, and provide timely feedback to students to guide their learning.

**How do you collaborate with colleagues and parents to support student success?** Answer I believe in strong partnerships with colleagues and parents to create a holistic support system for students. I collaborate with fellow teachers to share best practices and coordinate curriculum. I also maintain open communication with parents through regular updates, conferences, and discussions about student progress and goals.

**What do you see as the biggest challenge facing education today?** Answer One of the biggest challenges is ensuring equity and accessibility in education. Addressing disparities in resources, supporting diverse student needs, and fostering inclusive learning environments are critical to ensuring all students have equal opportunities to succeed.

**How do you stay current with educational trends and best practices?** Answer I actively participate in professional development workshops, conferences, and online courses to stay updated on educational research, trends, and innovative teaching strategies. I also collaborate with colleagues and engage in reflective practices to continuously improve my teaching.

**What are your strengths as a teacher?** Answer My strengths include strong communication skills, adaptability to diverse student needs, creativity in lesson planning, and a commitment to fostering a positive classroom environment. I am also dedicated to ongoing professional growth and development to enhance my teaching practices.

**Why do you think you would be a good fit for our school district?** Answer I am drawn to your school district's commitment to mention specific values or initiatives such as inclusivity, personalized learning, or community involvement. My teaching philosophy aligns with these values, and I am eager to contribute my skills, passion for education, and dedication to student success within your learning community.

These answers can be customized based on your teaching experiences, educational philosophy, and the specific requirements of the teaching position you are applying for.
