Biology  
Interactive  
Student  
Study  
Guide**

**North Salem University**

**MISSION:** *Engage students to continuously learn, question, define and solve problems through critical and creative thinking.*

**Spring  
2015**

*This chapter describes how biologist trace phylogeny (from the Greek, phylon - tribe and genesis - origin), the evolutionary history of a species or a group of related species. Reconstructing phylogeny is a part of the scope of systematics, the study of biological diversity in a evolutionary context. Systematics also includes taxonomy which names and classifies species. Our study of phylogeny and systematics begins with the fossils left by past life, such as the ancient fish found on page 484 or our fictitious creature called Caminalcules. We then examine the techniques through which systematists test and refine their hypotheses about phylogeny and classification. In the process, we will see how molecular biology is changing systematics, as it is changing every aspect of biology.*
