Theoretical Foundations of Learning Environments David Jonassen, David H. Jonassen, Susan Land, 2014-04-08

Theoretical Foundations of Learning Environments describes the most contemporary psychological and pedagogical theories that are foundations for the conception and design of open ended learning environments and new applications of educational technologies In the past decade the cognitive revolution of the 60s and 70s has been replaced or restructured by constructivism and its associated theories including situated sociocultural ecological everyday and distributed conceptions of cognition These theories represent a paradigm shift for educators and instructional designers to a view of learning as necessarily more social conversational and constructive than traditional transmissive views of learning Never in the history

of education have so many different theories said the same things about the nature of learning and the means for supporting it At the same time although there is a remarkable amount of consonance among these theories each also provides a distinct perspective on how learning and sense making occur This book provides students faculty and instructional designers with a clear concise introduction to these theories and their implications for the design of new learning environments for schools universities and corporations It is well suited as a required or supplementary text for courses in instructional design and theory educational psychology learning theory curriculum theory and design and related areas *Resources in Education*,1998 DLP and Extensions John L. Nazareth,2011-06-28 DLP denotes a dynamic linear modeling and optimization approach to computational decision support for resource planning problems that arise typically within the natural resource sciences and the disciplines of operations research and operational engineering It integrates techniques of dynamic programming DP and linear programming LP and can be realized in an immediate practical and usable way Simultaneously DLP connotes a broad and very general modeling algorithmic concept that has numerous areas of application and possibilities for extension Two motivating examples provide a linking thread through the main chapters and an appendix provides a demonstration program executable on a PC for hands on experience with the DLP approach Solving Disproportionality and Achieving Equity Edward Fergus,2016-10-28 When the numbers don't lie this is your guide to doing what's right If your school is faced with a disproportionate rate of suspensions gifted program enrollment or special education referrals for students of color this book shows how you can uncover the root causes and rally your staff to face the challenge head on You will Understand how bias creates barriers to the success of students of color Know what questions to ask and what data to analyze Create your own road map for becoming an equity driven school with staff activities data collection forms checklists and progress monitoring tools **Operations Management** R.
