**Proving the Unprovable** Christopher Slobogin,2006-09-07 This book is written for researchers scholars advanced graduate students and clinicians who work in risk assessment and criminal responsibility It addresses the question of admitting expert testimony from behavioral health experts in determining matters of culpability and dangerousness by examining a number of factors including the source of the expert testimony whether juries need it and whether it is presented as proven or informed in the court It argues that the question cannot be understood as a dualistic matter of being for or against expert testimony rather its highly nuanced arguments show that determining who should be punished and who should be preventively detained must happen through an interdisciplinary process that looks at the specific circumstances of each case It offers an analytic framework for making these determinations that treats culpability and dangerousness not as static ontologically complete entities but rather as socially constructed concepts that cannot be determined solely through the scientific method The book makes the intriguing argument throughout that although expert testimony cannot be considered scientifically reliable or proven it should nevertheless be included as long as it can be classified and understood as informed speculation because it makes legal factfinders attend more closely to the matters that the law considers pertinent to past mental states It seeks to reconcile the tension between the law s demand for accuracy and the inability of behavioral science to provide more than speculative answers for most questions raised by the insanity defense and related doctrines and by sentencing commitment and sex offender statutes that require determinations of risk      *Ethics and Philosophical Critique in William James* Sarin Marchetti,2015-08-25 Marchetti offers a revisionist account of James s contribution to moral thought in the light of his pragmatic conception of philosophical activity He sketches a composite picture of a Jamesian approach to ethics revolving around the key notion and practice of a therapeutic critique of one s ordinary moral convictions and style of moral reasoning      Observations on Transaction Gerhard Gelbmann,2002 This book deals with two aspects of interpersonal communication the content aspect and the relationship aspect Concepts like meta communication are analysed as well as reductionism social system or aspect The study criticizes approaches toward a Philosophy of Communication which start from notions like Ordinary Language or Language Instinct or Communication as Oriented Toward Mutual Understanding This essay gives a vivid sometimes witty and polemical discussion of several points linked to themes like idealisation or systemic concept of person and it proposes an attempt to base a conception of communication on the constructivist s understanding of the term of observation The way how a comprehension of transaction is shaped proves to be useful for understanding emotions as an element of human life and social interaction
