

RICETRASMETTITORE PHILIPS "CALLPAC" PRC/VRP 2000 TACTICAL HF RADIO

Federico Baldi, IZ1FID

Dopo la descrizione del Racal PRM-4031, della PRC-515, voglio portare alla vostra attenzione un altro ricetrasmittitore portatile ("manpack") di progettazione e costruzione ancora più recente: il CALLPAC PRC-2000 di co-produzione belga (PHILIPS) ed inglese (MEL)

Il Callpac, realizzato nella seconda metà degli anni 80 (il manuale tecnico riporta la data del 1986) e prodotto sino a tutti gli anni 90 è un ricetrasmittitore per onde corte (HF), portatile, finalizzato alla trasmissione in voce (SSB), telegrafia (CW) o dati con una copertura sino a 30km per onda di terra, ovviamente sostituendo all'antenna verticale un dipolo si ottiene una notevole estensione del raggio di copertura. Analogamente ad altri apparati della sua categoria è stato concepito al fine di consentire sia un impiego

portatile che per essere utilizzato in sistemi veicolari o fissi ove è previsto l'uso di un finale di potenza rispettivamente di 100 e 400 W. A tale proposito vale la pena di fare una considerazione: gli apparati, come PRM-4031 e PRC-2000, per i quali è stato previsto un uso esteso (non solo portatile) risultano essere particolarmente curati nella loro sezione ricevente.

Tornando al CALLPAC PRC-2000 le caratteristiche salienti sono rappresentate dal fatto che l'unità consente l'utilizzo a singolo o doppio operatore, l'uso

China's Banking Law and the National Treatment of Foreign-Funded Banks Wei Wang, 2016-05-23 This book assesses new developments in and reform of China's banking law system following its accession of the WTO. It focuses on the relationship between GATS WTO national treatment obligations and China's banking law. Tracing the history of national treatment in China, the book compares the treatment of foreign-funded banks with the treatment of Chinese-funded banks and examines the structure and shortcomings of the existing banking law framework in China. Offering suggestions as to how the framework could be restructured and analysing the economic and political bases of an integrated banking law framework, the book argues that reorganization would bring about greater consistency with GATS WTO national treatment requirements. The book also explores the ambiguous definition of prudential carve-out, the subtle relationship between GATS national treatment and market access based on WTO cases, national treatment clauses in China's bilateral investment treaties and special treatment on banking in China's free trade agreements. This volume is a valuable resource for academics and students as well as professionals and policy makers working in the field of banking, WTO, Chinese law and foreign trade. *Moody's International Manual*, 1997

The Buddha Party John Powers, 2017 The Buddha Party tells the story of how the People's Republic of China employs propaganda to define Tibetan Buddhist belief and sway opinion within the country and abroad. The narrative they create is at odds with historical facts and deliberately misleading, but John Powers argues it is widely believed by Han Chinese. Most of China's leaders appear to deeply believe the official line regarding Tibet, which resonates with Han notions of themselves as China's most advanced nationality and as a benevolent race that liberates and culturally uplifts minority peoples. This in turn profoundly affects how the leadership interacts with their counterparts in other countries. Powers's study focuses in particular on the government's patriotic education campaign, an initiative that forces monks and nuns to participate in propaganda sessions and repeat official dogma. Powers contextualizes this within a larger campaign to transform China's religions into patriotic systems that endorse Communist Party policies. This book offers a powerful comprehensive examination of this ongoing phenomenon: how it works and how Tibetans resist it.

Practical Spoken Dialog Systems Deborah Dahl, 2007-09-28 For professional speech researchers, there is a rich technical literature covering many years of primary research in speech. However, this literature is not necessarily applicable to the needs of business people, application developers and students who are interested in learning about the practical uses of speech technology. On the other hand, while existing introductory resources cover the basic mechanics of development of application development as well as aspects of the voice user interface, they don't go far enough in dealing with the details that have to be taken into account to make spoken dialog systems successful in practice. What's missing is information in between: the in-depth technical literature and the more introductory development resources. The goal of this book is to provide information for anyone who wants to

take the next step beyond the basics of current speech applications but isn't yet ready to dive into the technical literature. It is hoped that this book will help project managers, application developers and students gain a fuller and more complete understanding of spoken dialog technology and the practical aspects of developing and deploying spoken dialog applications.
