**Bangladesh-Japan Partnership** Fahmida Khatun, Syed Yusuf Saadat, Kashfia Ashraf, Afrin Mahbub, 2023-06-22

This book analyses the trade relationship between Bangladesh and Japan including foreign investments and foreign aid by Japan to Bangladesh. It emphasises how Japan may support Bangladesh in its next development journey during the fourth industrial revolution 4IR and after Bangladesh's Least Developed Country LDC graduation. This is the first book to present a comprehensive evaluation of Bangladesh's economic relationship with Japan including how it has evolved over the preceding fifty years and its possibilities and implications for the future. The book draws attention to the importance of increased economic diversification for Bangladesh in terms of skill and productivity with the increasing need to accelerate technological adoption from Japan to be on par with international competition following Bangladesh's LDC graduation. It presents a thorough examination of Bangladesh's prospects to access the Japanese market as well as Japan's assistance in the development of human capital and infrastructure in Bangladesh. It also discusses how Bangladesh might both attract additional foreign direct investment FDI from Japan and improve its technical skills by utilising expertise obtained through Japanese investments. This new study will inform policy discourse, influence relevant policies and inspire future research on these key issues.

*Hydropower in the New Millennium* B. Honningsvag, G.H. Midttomme, K. Repp, K. Vaskinn, T. Westernen, 2020-12-18

The power sector has undergone a liberalization process both in industrialized and developing countries involving market regimes as well as ownership structure. These processes have called for new and innovative concepts affecting both the operation of existing hydropower plants and transmission facilities as well as the development and implementation of new projects. At the same time, a sharper focus is being placed on environmental considerations. In this context, it is important to emphasize the obvious benefits of hydropower as a clean renewable and sustainable energy source. It is however also relevant to focus on the impact on the local environment during the planning and operation of hydropower plants. New knowledge and methods have been developed that make it possible to mitigate the local undesirable effects of such projects. Development and operation of modern power systems require sophisticated technology. Continuous research and development in this field is therefore crucial to maintaining hydropower as a competitive and environmentally well accepted form of power generation.
