the use of poison gas in World War I vividly described and Glenn Seaborg and Harold Urey were leaders in World War II's Manhattan Project Urey and Linus Pauling worked for nuclear disarmament after the war Science was not always fair and many were excluded The Nazis pushed Jewish scientists like Haber from their posts in the 1930s Anti-Semitism was also a force in American chemistry and few women were allowed in Pauling for example used his influence to cut off the funding and block the publications of his rival Dorothy Wrinch Cathedrals of Science paints a colorful portrait of the building of modern chemistry from the late 19th to the mid 20th century
