Conform Glenn Beck, 2014-05-06 Glenn Beck the New York Times bestselling author of The Great Reset considers the hot button issue of education in the US exposing the weaknesses of the Common Core school curriculum and examining why liberal solutions fail Public education is never mentioned in the constitution Why Because our founders knew that it was an issue for state and local governments not the federal one It s not a coincidence that the more the federal government has inserted itself into public education over the years the worse our kids have fared Washington dangles millions of dollars in front of states and then tells them what they have to do to get it It s backdoor nationalization of education and it s leading us to ruin In Conform Glenn Beck presents a well reasoned fact based analysis that proves it s not more money our schools need it s a complete refocusing of their priorities and a total restructuring of their relationship with the federal government In the process he dismantles many of the common myths and talking points that are often heard by those who want to protect the status quo Critics of the current system are just teacher bashers Teachers unions put kids first Homeschooled kids suffer both academically and socially local control is an excuse to protect mediocrity Common Core is rigorous and state led Critics of Common Core are just conspiracy theorists Elementary school teachers need tenure We can t reform schools until we eradicate poverty school choice takes money away from public schools Charter schools perform poorly relative to public schools There is no issue more important to America s future than education The fact that we ve yielded control over it to powerful unions and ideologically driven elitists is inexcusable We are failing ourselves our children and our country Conform gives parents the facts they need to take back the debate and help usher in a new era of education built around the commonsense principles of choice freedom and accountability

Teaching the World's Teachers Lauren Lefty, James W. Fraser, 2020-07-07 Examining teacher education in an international context this book captures the diversity of the world s educators Many countries confront surprisingly similar challenges in preparing K 12 educators for success while national contexts also make for surprising differences In Teaching the World s Teachers education historians Lauren Lefty and James W Fraser and their contributors make a convincing case for approaching these shared challenges from a more global and historically minded perspective Written by education scholars from eleven different countries Argentina Brazil Catalonia Spain China England Finland Ghana Israel Singapore South Africa and the United States this book provides histories of teacher education reforms between roughly 1980 and 2020 The authors show how international trends that emerged during this period collided with national and regional contexts to produce unique teacher education systems in different nations While in some countries the embrace of markets and competition led to a

deregulation of the teacher preparation field in others teaching became a highly regulated and centralized affair At the same time ideas and structural models cross borders and education leaders borrow from each other while reshaping plans in each place Opening with a broad historical overview of global teacher education models beginning in the late eighteenth century Teaching the World s Teachers argues that the field has long been characterized by cross border connections but shaped by geopolitical hierarchies of power In an era when teacher quality is widely recognized as one of the most important factors in a child s education this volume encourages dialogue among teacher educators and policymakers around the world By understanding the context and contingency of where we have been the authors hope that readers will walk away with a more empowered sense of where we are headed in the all important task of teaching the world s teachers Contributors Kwame Akyeampong Richard Andrews Azeem Badroodien Maria In s G F Marcondes de Souza Gustavo E Fischman James W Fraser Guangwei Hu Arie Kizel Jari Lavonen Lauren Lefty Wei Liao Jason Loh Silvana Mesquita Hannele Niemi Lily Orland Barak Paula Razquin Carol Anne Spreen Eduard Vallory Yisu Zhou

South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet

thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI
