This Life's Tempestuous Sea Douglas Charles Toland, 2013-06-20 In a weak moment I have written a book Margaret Mitchell This book is a multilayered creation that touches on a wide array of topics many of them drawn from personal experiences Indeed you the lucky reader will be blessed with enough material for at least three books within one cover Why would I want to write such a multi-themed book It wasn't my original intention Maybe I've learned an important lesson and won't do so next time Like many older folks I wanted to share what I have learned to be true and useful and couldn't seem to stay with a single topic I've lived long enough to confirm an important realization the gleanings from a well-lived life are at least as important as knowledge gained vicariously through reading and classroom attendance But I think most people don't fully appreciate the value of their life lessons and end up taking most of them to the grave I want to counter that pattern and use this book to share as many of my gleanings as I can I also recognize several imminent dangers facing this nation and our planet and feel compelled to share these concerns Just as important I want my wife children and grandchildren to know more about who I

was and who I've come to be I hope they will have occasions to use some of my wisdom Gold, Oil and Avocados Andy Robinson, 2021-08-17 The past decade has seen major political upheaval in Latin America from Brazil to Chile to Venezuela to Bolivia but to understand what happened ask first where your quinoa and lithium batteries came from The 21st century began optimistically in Latin America Left leaning leaders armed with programs to reduce poverty and reclaim national wealth were seeing results but as the aughts gave way to the teens they began to fall like dominos Where did the dreams of this pink tide go Look no further than the original culprits of Latin American disenfranchisement resource rich land and unscrupulous extraction Recounting the story commodity by commodity Andy Robinson reveals what oxen have to do with the rise of Jair Bolsonaro how quinoa explains the mob that descended on Evo Morales and why oil is the culprit behind the protracted coup in Venezuela In addition to the usual suspects like gold and bananas which underscored the original plunder of the Americas Robinson also shows how a new generation of valuable resources like coltan for smartphones lithium for electric cars and niobium for SpaceX rockets have become important players in the fate of Latin America And as the energy transition sets mineral prices soaring Latin America remains at the mercy of the rollercoaster of commodity prices In Gold Oil and Avocados Robinson takes readers from the salt plains of Chile to the depths of the Amazonian jungle to stitch together the story of Latin America's last decade showing how the imperial plunder of the past carries on today under a new name
