Adolescence is often considered as one of the most challenging, most turbulent and most difficult phases of life for both children and their parents. During this transition from childhood to adulthood, teenagers often seek the possibility of being able to identify themselves as they start to search for their place in this world. They also learn to interact with the other members of the society, define their priorities, and adapt to social norms.

Some teenagers, unfortunately, do not go through this phase quite smoothly. Some even experiment with illegal substances, leading to further damage. Among the biggest problems is when teenagers start being a part of so-called teenage gangs. According to experts, this might be linked to a desire to have respect and authority in the society of teenage hierarchy. Gangs typically attract adolescents who are interested in belonging to a certain community that offers anonymity and security, while being susceptible to peer pressure.

According to studies, the percentage of criminals among teenagers is quite high. This only means that this problem among teenagers being associated in gangs is definitely worth every attention. What is even more disturbing is even after quitting a gang, there is still a tendency to be involved in various illegal activities during adulthood. This can depict that even though a teenager may not commit a crime, for now, he may end up doing it later.

For parents who are concerned about the possibility of children joining gangs, there are certain criteria about the behavior of their children, as well as their appearance, that they have to pay attention to. Parents need to be extremely careful especially when it comes to identifying potential factors that give hints to this tendency. Typically, if a child starts having problems at school, hides activities from you, has unknown friends, wears particular symbols or colors all the time, you may have to check now.

Schooling by Design Grant Wiggins, Jay McTighe, 2007-07-15 Why, despite years of trying, have efforts to achieve lasting, effective school reform fallen short? What curricular and policy elements must be in place to move forward? How should the roles of teachers and education leaders be defined to best support the point of school? Grant Wiggins and Jay McTighe answer these and other questions in *Schooling by Design: Mission, Action, and Achievement*. Building on the premise of *Understanding by Design*, their acclaimed framework for curriculum, instruction, and assessment, the authors present a compelling argument for using the same approach to reach a grand goal: the reform of schooling as a whole. In their view, reform rests on six pillars: A relentless focus on the long term mission of school: enabling learners to demonstrate understanding and mature habits of mind; A curriculum and assessment framework that honors the mission and ensures that content coverage is no longer the accepted approach to instruction; A set of principles of learning that support all decisions about pedagogy and planning; Structures, policies, job descriptions, practices, and use of resources consistent with mission and learning principles; An overall strategy that includes ongoing feedback and adjustment; and A set of tactics linked to strategy, including a planning process that uses backward design to accomplish the key work of reform. Practical, insightful, and provocative, *Schooling by Design* elaborates on each of these elements and presents educators with both the rationale and the methodology for closing the gap between what we say we want from school and what school actually delivers, for turning vision into reality.
