Institute for the Study of Economic Policy,Statistics Canada,2002 Evidence is increasingly being demanded before education policy in Canada is developed Unfortunately all too often education research and policy proposals come from relatively isolated perspectives This volume arose from a project that brought together a diverse group of stakeholders as part of an ongoing effort to improve communications between relevant groups The authors focus on aspects of evidenced based decision making for education in the Canadian context providing both survey articles and commentary Topics include new and innovative provincial initiatives such as la carte de la d favourisation au Qu bec and the Alberta Initiative for School Improvement AISI Major Canadian large scale testing initiatives including the Third International Math and Science Survey TIMSS the national Student Achievement Indicators Program SAIP and provincial testing programs are discussed and

selected studies resulting from these programs are presented Also included are overviews of currently relevant issues such as male female differences in test scores high school exit exams the causal impact of education on social assistance use and long term labour market outcomes teacher evaluations at universities and the optimal level of investment in education from an economic perspective Contributors are from university education faculties and economics departments provincial government ministries of education and related agencies school boards and other related organizations such as the Canadian Teachers Federation the Council of Ministers of Education Conseil Sup rieur de l ducation au Qu bec and Statistics Canada Reflecting Canada portions of the book are in French and others are in English      **Mathematics and the Historian's Craft** Michael Kinyon, Glen van Brummelen, 2006-06-18 The Kenneth May Lectures have never before been published in book form Important contributions to the history of mathematics by well known historians of science Should appeal to a wide audience due to its subject area and accessibility      **Canadiana** ,1989      Current Index to Journals in Education ,2001

Mayer, Paul E. Peterson, 2010-12-01 A Brookings Institution Press and Russell Sage Foundation publication Education is one of the largest sectors of the U S economy yet scholars educators policymakers and parents do not agree about what the money spent on education really buys In particular they do not agree on how much education improves children s ability to learn or whether the things children learn in school truly improve their chances for success as adults If schooling increases how much students know and what they know does pay off later then it is important to ask what schools can do to increase students learning and earning The essays in this book report estimates of the effects of learning on earnings and other life outcomes They also examine whether particular aspects of schooling such as the age at which children begin school classroom size and curriculum or structural reform such as national or statewide examinations or school choice affect learning Taken together their findings suggest that liberals are correct in saying that more investment is needed in early education that class sizes should be further reduced and that challenging national or state standards should be established But they also provide support for conservatives who ask for a more demanding curriculum and greater school choice Contributors include John Bishop Eric Hanushek James Heckman Christopher Jencks Caroline Minter Hoxby Fred Mosteller and Christopher Winship      **Sociological Abstracts** Leo P.
