The Assembly Reforms France

(pages 252–257)

What reforms resulted from the revolution?

In August 1789, the National Assembly took steps to change France. It made a revolutionary statement called the *Declaration of the Rights of Man*. One new law ended all the special rights that members of the First and Second Estates had enjoyed. Another law gave all French men equal rights. Though women did not get those rights, it was a bold step. Other laws gave the state power over the Catholic Church.

The new laws about the church divided people who had supported the Revolution. Catholic priests

were divided loyal to the church. They were angry that the church would be part of the state. The result, many of them opposed the Revolutionary reforms.

For months, the assembly worked on plans for a new government. During this time, Louis was forced for his safety. One night, he and his family tried to escape the country. They were caught, brought back to Paris, and placed under guard. This escape attempt made the king and queen more unpopular. It also increased the power of his enemies.
