Music, Performance, and the Realities of Film Ben Winters,2014-02-05 This book examines the relationship between narrative film and reality as seen through the lens of on screen classical concert performance By investigating these scenes wherein the performance of music is foregrounded in the narrative Winters uncovers how concert performance reflexively articulates music s importance to the ontology of film The book asserts that narrative film of a variety of aesthetic approaches and traditions is no mere copy of everyday reality but constitutes its own filmic reality and that the music heard in a film s underscore plays an important role in distinguishing film reality from the everyday As a result concert scenes are examined as sites for provocative interactions between these two realities in which real world musicians appear in fictional narratives and an audience s suspension of disbelief is problematised In blurring the musical experiences of onscreen

observers and participants these concert scenes also allegorize music's role in creating a shared subjectivity between film audience and character and prompt Winters to propose a radically new vision of music's role in narrative cinema wherein musical underscore becomes part of a shared audio visual space that may be just as accessible to the characters as the music they encounter in scenes of concert performance

Revenge Capitalism Max Haiven, 2020-05-20 Capitalism is in a profound state of crisis Beyond the mere dispassionate cruelty of ordinary structural violence it appears today as a global system bent on reckless economic revenge its expression found in mass incarceration climate chaos unpayable debt pharmaceutical violence and the relentless degradation of common life In *Revenge Capitalism* Max Haiven argues that this economic vengeance helps us explain the culture and politics of revenge we see in society more broadly Moving from the history of colonialism and its continuing effects today he examines the opioid crisis in the US the growth of surplus populations worldwide and unpacks the central paradigm of unpayable debts both as reparations owed and as a methodology of oppression *Revenge Capitalism* offers no easy answers but is a powerful call to the radical imagination

Defining Deutschtum David Lee Brodbeck, 2014 *Defining Deutschtum* Political Ideology German Identity and Music Critical Discourse in Liberal Vienna offers a nuanced look at the intersection of music cultural identity and political ideology in late nineteenth century Vienna Drawing on an extensive selection of writings in the city's political press correspondence archival documents and a large body of recent scholarship in late Habsburg cultural and political history author David Brodbeck argues that Vienna's music critics were important agents in the public sphere whose writings gave voice to distinct sometimes competing ideological positions These conflicting positions are exemplified especially well in their critical writings about the music of three notable composers of the day who were Austrian citizens but not ethnic Germans Carl Goldmark a Jew from German West Hungary and the Czechs Bedřich Smetana and Antonín Dvořák Often at stake in the critical discourse was the question of who and what could be deemed German in the multinational Austrian state For critics such as Eduard Hanslick and Ludwig

Speidel traditional German liberals who came of age in the years around 1848 Germanness was an attribute that could be earned by any ambitious bourgeois including Jews and those of non German nationality by embracing German cultural values The more nationally inflected liberalism evident in the writings of Theodor Helm with its particularist rhetoric of German national property in a time of Czech gains at German expense was typical of those in the next generation educated during the 1860s The radical student politics of the 1880s with its embrace of racialist antisemitism and irredentist German nationalism just as surely shaped the discourse of certain young Wagnerian critics who emerged at the end of the century This body of music critical writing reveals a continuum of exclusivity from a conception of Germanness rooted in social class and cultural elitism to one based in blood Brodbeck neatly counters decades of musicological scholarship and offers a unique insight into the diverse ways in which educated German Austrians conceived of Germanness in music and understood their relationship to their non German fellow citizens Defining Deutschtum is sure to be an essential text for scholars of music history cultural studies and late 19th century Central European culture and society
