Dark Commerce Louise I. Shelley, 2020-11-10 Though mankind has traded tangible goods for millennia recent technology has changed the fundamentals of trade in both legitimate and illegal economies In the past three decades the most advanced forms of illicit trade have broken with all historical precedents and as Dark Commerce shows now operate as if on steroids tied to computers and social media In this new world of illicit commerce which benefits states and diverse participants trade is impersonal and anonymized and vast profits are made in short periods with limited accountability to sellers intermediaries and purchasers Louise Shelley examines how new technology communications and globalization fuel the exponential growth of dangerous forms of illegal trade the markets for narcotics and child pornography online the escalation of sex trafficking through web advertisements and the sale of endangered species for which revenues total in the hundreds of millions of dollars The illicit economy exacerbates many of the world's destabilizing phenomena the perpetuation of conflicts the proliferation of arms and weapons of mass destruction and environmental degradation and extinction Shelley explores illicit trade in tangible goods drugs human beings arms wildlife and timber fish antiquities and ubiquitous counterfeits and contrasts this with the damaging trade in cyberspace where intangible commodities cost consumers and organizations billions as they lose identities bank accounts access to computer data and intellectual property 104-2

Videmšek, Maja Prijatelj Videmšek, 2023-08-15 Meet Najin and Fatu the last of the northern white rhinos as well as the scientists conservationists and rangers who are fighting for the species survival The last two remaining northern white rhinos an already functionally extinct species are kept behind three electrical fences and protected by a squad of rangers at the Ol Pejeta Conservancy in Kenya Their names are Najin and Fatu Both are descended from the last male northern white rhino Sudan Najin is his daughter while Fatu is his granddaughter Along with Sudan and another male named Suni they were transferred to Kenya in 2009 in the hope that returning them to their natural habitat might help them regain their zest for life and reproduction Unfortunately things didn't go to plan With the deaths of Sudan and Suni the northern white rhinos destiny is now in the hands of their Kenyan caretakers and a team of scientists at the BioRescue international consortium which is developing and using several different techniques to resurrect the species including assisted reproduction and stem cell technologies The plan is to insert northern white rhino embryos into southern white rhino surrogate mothers as soon as possible There is a real chance the first new northern white rhino baby will be born in late 2023 Will science prevail or is it too late Journalists Boštjan Videmšek and Maja Prijatelj Videmšek explore this question by taking readers on a journey through the history of the northern white rhinos They introduce the rangers conservationists and scientists fighting for the future of the northern white rhinos and dissect what led the species to the brink of extinction from wars and climate change to poaching and the black market *The Last Two* offers hope for the future of the environment and the fight to save the many species that call Earth home **'African Potentials' for Wildlife Conservation and Natural Resource Management**

Toshio Meguro, Chihiro Ito, 2021-10-01 This book focuses on two specific areas wildlife conservation policies and projects and the interaction between local societies and the surrounding environment in Africa Against the internationally dominant

approach that regards Africa as being a state of deficiency this book demonstrates based on fieldwork concerning various natural resources e g wildlife forests fruit fish and land as well as many famous protected areas that African people are collectively and actively trying to solve the environmental problems they are facing by strategically utilising both indigenous means and new extrinsic opportunities Meanwhile it also becomes clear that wildlife conservation still continues to cause local societies a multitude of problems and the potentials of local people and societies are existing but unnoticed and suppressed by powerful outsiders and therefore remaining informal and invisible **Rhino and Tiger Conservation** United States. human-wildlife conflict and coexistence Silvio Marchini,Alexandra Zimmermann,Katia Maria P. M. B. Ferraz,Jenny Anne Glikman,2023-03-27 **Rick the Rhino** Dr. Ross Gordon Cooper,2015-07-18 Rhino occupy a unique part of the food chain and wide niches in specific ecosystems in which they have developed their own behaviour patterns and interactions with other species They form an essential part of the animal kingdom and their loss would have significant ramifications for other dependant flora and fauna The large numbers of rhino orphans and the loss of pregnant females are decimating wild rhino populations This decline is mainly due to poaching for their horns that are made of keratin and which have no proven medical benefit to humans Greedy markets in China Vietnam and Yemen and criminal syndicates offer extremely high prices for rhino horn making it more valuable than gold Whilst tackling the poachers head on is essential it is sadly not enough and vigorous education programmes need to be put in place to inform people of the ecological economic aesthetic and touristic value of rhino This book is dedicated to the plight all rhino species face including museum specimens and fossils **Endangered Rhinos** Jan M. Czech,Jane Katirgis,2015-07-15 Rhinoceroses are some of the oldest creatures on our planet And yet despite surviving for thousands of years this ancient animal is now endangered Why Discover fascinating facts about rhinos and learn how you could help save them before it s too late **The Extinction Market** Vanda Felbab Brown,2017-11-15 The planet is currently experiencing alarming levels of species loss caused in large part by intensified poaching and wildlife trafficking

Africa's Threatened Rhinos Keith Somerville, 2025-01-14 Africa's surviving rhinos are under serious threat Poaching for their horns massive extermination by sports hunters in the nineteenth and first half of the twentieth century and progressive habitat loss have all driven black and white rhino close to the edge This book considers human interactions with these magnificent and enigmatic animals charting hunting for food and hides and then hunting for horn to meet external demand for this much coveted commodity as well as peaceful coexistence over the course of three millennia With only two females alive in a closely protected reserve in Kenya the Northern White Rhino is on the brink of extinction The Southern White Rhino was increasing in numbers but poaching in South Africa Botswana and Namibia has now reduced the population to fewer than 20 000 while Black Rhino are hovering around the 6 000 6 500 mark also with the danger of extirpation everywhere but in parts of eastern and southern Africa Many books have been written on poaching and the decline of the rhino often from a very personal engaged viewpoint This volume takes the reader into important new territory showing how human agency has led to the situation we now face Covering the history of commercial and sporting exploitation of rhino it brings the picture up to date with an overview of contemporary conservation and anti poaching operations This urgent work is a significant contribution to our understanding of wildlife on the African continent

Situational Prevention of Poaching Andrew Lemieux, 2014-03-05 For centuries criminologists have looked for scientific ways to study understand and ultimately prevent crime In this volume a unique offense poaching is explored in various contexts to determine what opportunity structures favor this crime and how situational crime prevention may reduce its prevalence The data sources used range from publically available secondary data about animal populations to interviews with hunters to actual law enforcement data collected inside protected areas Various methods are utilized to look for patterns in poaching behaviour regarding where poachers strike which species they target and their modus operandi Collectively the volume shows that principles of criminal opportunity theory and situational crime prevention are useful for studying and preventing poaching in a variety of contexts The methods employed by each chapter are easily replicated and meant to stimulate empirical poaching research where data is available While the theoretical grounding of this volume is drawn from criminology it is written for a broad audience of academics practitioners and those

interested in wildlife conservation *Environmental Crime and Social Conflict* Avi Brisman, Nigel South, Rob White, 2016-03-09 This impressive collection of original essays explores the relationship between social conflict and the environment a topic that has received little attention within criminology The chapters provide a systematic and comprehensive introduction and overview of conflict situations stemming from human exploitation of environments as well as the impact of social conflicts on the wellbeing and health of specific species and ecosystems Largely informed by green criminology perspectives the chapters in the book are intended to stimulate new understandings of the relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world With a goal of creating a typology of environment social conflict relationships useful for green criminological research this study is essential reading for scholars and academics in criminology as well as those interested in crime law and justice
