## **Rhino Poaching Memorandum Activity Literature Research:**

**Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events

**Annuaire Des Organisations Internationales , Operation Lock and the War on Rhino Poaching** John Hanks, 2015 The definitive account of a daring and controversial covert operation to stop the aggressive illegal trade in rhino horn in the 1980s

**Africa's Threatened Rhinos** Keith Somerville, 2015-01-14 Africa's surviving rhinos are under serious threat Poaching for their horns massive extermination by sports hunters in the nineteenth and first half of the twentieth century and progressive habitat loss have all driven black and white rhino close to the edge This book considers human interactions with these magnificent and enigmatic animals charting hunting for food and hides and then hunting for horn to meet external demand for this much coveted commodity as well as peaceful coexistence over the course of three millennia With only two females alive in a closely protected reserve in Kenya the Northern White Rhino is on the brink of extinction The Southern White Rhino was increasing in numbers but poaching in South Africa Botswana and Namibia has now reduced the population to fewer than 20 000 while Black Rhino are hovering around the 6 000 6 500 mark also with the danger of extirpation everywhere but in parts of eastern and southern Africa Many books have been written on poaching and the decline of the rhino often from a very personal engaged viewpoint This volume takes the reader into important new territory showing how human agency has led to the situation we now face Covering the history of commercial and sporting exploitation of rhino it brings the picture up to date with an overview of contemporary conservation and anti poaching operations This urgent work is a significant contribution to our understanding of wildlife on the African continent

**Rhino Poaching** Janina Naef, 2016 Rhino horn is very popular in Asia as it is a status symbol and used as medicine That is one reason why the number of these animals is decreasing continuously In 2007 13 rhinos were poached in South Africa while in 2015 the number increased to 1175 rhinos This Matura Paper deals with problems of rhino poaching in South Africa It poses into the question if it is still possible to see rhinos in the future and examines what should be done to save this species from extinction Therefore 5 theses has been stated which consist of political financial protection measures and enlightenment of local and Asian people Thereby an interview has been conducted with a conservationist in addition to research in a volunteering project in South Africa regarding these theses The results prove the problems already stated If there are no changes in one of these problems the rhino doubtfully has a future

**Conservation of Species and the Endangered Rhinoceros** United States. Congress. House. Committee on Science and Technology. Subcommittee on Natural Resources, Agriculture Research, and Environment, 1987

**Rick and Rachel Build a Research Report** Sue Lowell Gallion, 2013-07-01 Rick is researching and writing a report about rhinos for school It seems like a really big assignment until Rachel helps him make a plan As he finds out about rhinos he learns new ways to do research and organize his information

What will Rick report about rhinos Concepts include revising scanning and using reliable sources Aligns to Common Core English Language Arts requirements for Writing Writing Activities in the back help the reader write their own research report Ivory, Horn and Blood Ronald Orenstein,2013-07-25 Meticulous research chilling facts an important and much needed book Dr Jane Goodall DBE Founder The Jane Goodall Institute If it is understanding you seek turn these pages Virginia McKenna OBE Founder The Born Free Foundation If you care about elephants and rhinos and the poaching onslaught that threatens their extinction in the wild this is the book for you Ian Redmond OBE Ambassador UN Great Apes Survival Program As recently as ten years ago out of every ten African elephants that died four fell at the hands of poachers The figure today is eight Over sixty percent of Africa s Forest Elephants have been killed by poachers since the turn of the century Rhinoceroses are being slaughtered throughout their ranges The Vietnamese One horned Rhinoceros and the Western Black rhino have become extinct in the last decade and the Northern White Rhinoceros the largest of them all barely survives in captivity This alarming book tells a crime story that takes place thousands of miles away in countries that few of us may visit But like the trade in illegal drugs the traffic in elephant ivory and rhinoceros horn has far reaching implications not only for these endangered animals but also for the human victims of a world wide surge in organized crime corruption and violence Since the worldwide ban on commercial ivory trade was passed in 1989 after a decade that saw half of Africa s elephants slaughtered by poachers Ronald Orenstein has been at the heart of the fight Today a new ivory crisis has arisen fuelled by internal wars in Africa and a growing market in the Far East Seizures of smuggled ivory have shot up in the past few years Bands of militia have crossed from one side of Africa to the other slaughtering elephants with automatic weapons A market surge in Vietnam and elsewhere has led to a growing criminal onslaught against the world s rhinoceroses The situation for both elephants and rhinos is dire **Four Years for the Rhino** Kamalajaṅga Kumvara,2012 **Technologies for Conserving Species** United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Natural Resources, Agriculture Research, and Environment,1988 **How to Study Rhinos** Bayard H. Brattstrom,Martha A. Brattstrom,Mary E. Shipman,2016-04-29 Rhinos are interesting fun to watch and endangered of becoming extinct This book is first about how scientists study rhinos and then information is presented on rhino taxonomy distribution ecology fossil history behavior reproduction and conservation including poaching But there is a lot more to rhinos than just the above there are also sections on rhinos in history rhinos in art rhino companies logos and products as well as lists of rhino books toys and conservation organizations **Help the Black Rhinoceros** Grace Hansen,2018-12-15 This title will teach readers about the black rhinoceros and where it lives It will also let readers know that black rhinos are critically endangered and that they face many threats like poaching and habitat loss Aligned to Common Core Standards and correlated to state standards Abdo Kids Jumbo is an imprint of Abdo Kids a division of ABDO **Death and Destruction** Richard Wayne Charlton,2017 The poaching of wildlife has been a concern to many involved in the protection of wildlife Poaching is found throughout the world

and has been around for thousands of years In the past century poaching has reached new heights and the concern of an extinction of a species has brought the topic of poaching to new light Whilst poaching has been seen as a biological or conservation topic in the past criminologists around the world have now started to delve into the topic The poaching of wildlife and more so in recent years rhino poaching has been a concern in South Africa South Africa has seen an increase in rhino poaching in the past 8 years where over 4 000 rhinos have been slaughtered This research aims to give insight into the current rhino poaching epidemic in South Africa and looks at the problem from a criminological point of view where possible solutions can be recommend using criminological theories for the prevention of rhino poaching *Asian Rhinos* ,1989

Conservation of Rhinos and Reauthorization of the Sikes Act United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Environment and Natural Resources,1994 Development of a Rhino Anti-poaching Model for Game Farms and Nature Reserves in the Free State Province of South Africa H.L. Jordaan,2018 During the last ten years the rhino populations of South Africa have suffered under an intense poaching onslaught This onslaught has moved to the Free State Province of South Africa and there is a justified concern that its rhino populations are at risk To protect the rhinos in the Province a need exists to manage the risk of poaching through a practical rhino anti poaching model which can assist to protect them effectively This Rhino Anti Poaching Model can determine and predict a poaching risk can identify weaknesses can assist to address problem areas and will enable efficient monitoring It is imperative to know which rhino species occurred in the Free State Province in historical times to ensure that the correct rhino species is protected against the risk of poaching and that they be kept in a suitable habitat Nine farms in the Free Sate have rhino as a prefix in their names which may be an indication that rhino did occur in the Province Various historical photos and literature give a retrospective view and show that there was insufficient browsing vegetation for black rhinos to survive The occurrence of open grassland however suggests that white rhinos did occur in those specific areas during the time of the first pioneers During this study period a count of rhinos was done and currently there are 669 white rhinos and 11 black rhinos in the Province thus a total of 680 rhinos in the Free State Province The South African Constitution mandated the State to enforce measures that will ensure adequate environmental protection for the benefit of future generations The South African government promulgated a myriad of new environmental legislation Several international agreements were also introduced as enforcement tools to regulate rhinos The enforcement measures are noble but out of balance with many inspectors but too few law enforcement officials It also over regulates and ensnare officials in minor issues A brief discussion on the latest technological innovations gives insight to the purpose of its development and effectiveness in combating rhino poaching There are currently no technical or strategic solutions to save rhinos from poaching therefore a combination of techniques is needed Although self manufactured unconventional devices seem to be more efficient to deceive poachers a combination with the latest technological equipment and conventional strategies might be the best solution to counter rhino poaching Free

State rhino farmers own 90% of the Province's rhinos. However, these rhino farmers lack the appropriate security measures required to adequately protect their rhinos. A questionnaire was developed and data were collected providing statistics on the current stance of security measures on rhino sites in the Province. It showed that 80% of rhino poaching occurs in rhino camps bordering public roads, 69% of the rhino sites located within 20km from the nearest town reported poaching, and 77% of large rhino camps are prone to poaching incidents. 57% of the respondents experienced rhino poaching on their sites. Through the questionnaire, it was gathered that rhino farmers in the Province are not vested in the concept of using trained rhino security. A Production Loss Formula was constructed that calculates the production loss of a poached rhino.

Poaching, Wildlife Trafficking and Security in Africa Cathy Haenlein, M L R Smith, 2017-07-06. A worldwide surge in poaching and wildlife trafficking is threatening to decimate endangered species. This crisis also threatens the security of human beings in ways ignored until recently by decision makers slow to begin to treat what is typically viewed as a conservation issue as serious crime. Over the past decade, as the scale and profitability of poaching and wildlife trafficking have grown, politicians, journalists, and campaigners throughout the world have begun to take notice; they are offering striking appraisals of the threat posed not only to endangered species but also to human populations. Many of these appraisals, however, are made in the absence of a detailed body of empirical research and analysis to underpin them. The result is the growth of a range of myths and misperceptions around the security threats posed, particularly as they relate to Africa. Poaching, Wildlife Trafficking and Security in Africa examines the most common narratives on poaching, wildlife trafficking, and security. It critically analyses the dominant discourses on poaching and wildlife trafficking as threats to human security, as drivers of conflict, as funders of terrorism, and as a focus for organised crime. In doing so, it seeks to sort myth from reality, to clarify how poaching and wildlife trafficking, as much cited threats to security, can most accurately be conceived. Such a study is crucial to the efforts of stakeholders now rightly looking to respond not just to the threat posed to endangered species but also to the security and wellbeing of human beings.

**Ten Rhino Poems** Ross Gordon Cooper, 2015-05-24. The rhino is listed as critically endangered. This is sad because they were quite common in the wild when I grew up in Africa. There needs to be a global concerted effort to prevent their extinction. They are of immense importance, ecologically, economically, and psychologically. If they are lost, there will be a void on Earth that will never be filled. I decided to write ten poems on the rhino following an extensive read of current literature and reports. I wish it to be educational, and I sincerely hope that this book will encourage, enlighten, and enthuse everybody who reads it. It is my wish that proceeds on sales will reach those dedicated to the care of rhinos as orphans or adults. Together we can help fight the war against rhino poaching.

*Blood Moon* Dereck Joubert, Beverly Joubert, 2025-09-09. Following a lifetime of animal rescue and African wildlife conservation efforts, Beverly and Dereck Joubert raise the alarm to the plight of the rhino. This oversized volume is both a celebration of these magnificent animals and a call to action to save them from vanishing forever. *Blood Moon* tells the tale of

the extraordinary efforts to rescue rhinos from high poaching zones in South Africa and save the species in secret locations in Botswana Involving the help of military personnel planes helicopters and private sector gunboats this is an action packed story The breathtaking images and riveting prose not only capture the never before seen rescue of rhinos but also transcend wildlife publishing to celebrate the life of these elusive animals and the vanishing habitats of Africa This book takes wildlife imagery to a new level Here the striking black and white photography is paired with the use of red which has always been symbolic of wealth in the East the largest market for rhino horns Blood Moon is an inspiring demonstration of what humanity can do if we try to turn back extinction Proceeds from this book benefit the Great Plains Foundation with a mission to conserve and expand natural habitats in Africa through education programs community initiatives and wildlife and environmental stewardship in Botswana Kenya and Zimbabwe Great Plains Conservation and its Foundation manage over 1 000 000 acres of land in sub Saharan Africa with plans to expand to 5 000 000 acres across a variety of critically important and fragile landscapes throughout Africa     *The Great Rhino Rescue* Sandra Markle,2020-01-01 Audisee eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience Southern white rhinos are in trouble For years a rumor has been spreading that their horns can be used to cure cancer and poachers have been targeting these gentle creatures Sandra Markle takes readers behind the scenes to see how civilians volunteer organizations and African governments are working together to protect rhinos
